Quick Reference

One line per page: what it is for, and what to look at first. Most pages have filters at the top (period, store, Operation Manager, Operation Consultant, and so on), and almost every page has a red lightbulb "Page Guide" button at the top right that explains the page.

Page	Use it to	Look at first
Workforce Overview	See who works for you right now	Total headcount, tenure mix, store table
Workforce Planning	Compare planned headcount with actual	Fill Rate, Shortage, stores marked Understaffed
Hiring Forecast	Plan hires month by month	Busiest month, next 3 months
Crew Trainers	Check the 1-trainer-per-6-crew rule	Trainers vs the rule, stores with no trainers
Turnover	See who is leaving and where	Turnover Rate, reasons, stores at the top
90-Day Turnover	See new hires who leave within 90 days	90-Day Rate, by store
Comparisons	Compare two periods	Change in Turnover Rate and 90-Day Rate
Retention	See how long people stay	6-month retention, tenure cards
Exit Interviews	Understand why people leave	Positive sentiment, top reasons, engagement drivers
Early Warning	Spot people who may be about to leave	High-Risk table
Scorecard	Rank Store Leaders on four metrics	Turnover rate, Above Average leaders, flagged consultants/managers
Action Center	Follow store health and open Action Plans	Critical stores, tier, stalled plans
Stores	Browse every store at a glance	Health badge on each store card
Reports	Download Excel reports	Pick the report card you need

Tips

- On pages that have filters, pick a store, manager or consultant and the charts and tables on that page follow your choice.
- Where a table column header shows a sort arrow, click it to sort (click again to reverse).
- Open your avatar menu (top right) to switch between English and Arabic, or between light and dark mode.
- Charts: hover over a bar or point to see its exact value.

Workforce Overview

Where to find it: Side menu > Workforce Overview

Use this page to answer one question: who works for me right now, and is the team in good shape? It is a snapshot of your active headcount, so most charts here count current employees, not resignations (that is the Turnover page).

Step 1 - Choose your scope

September 2026

September 2026

All Stores

All Operation Managers

All Operation Consultants

All Senior Operation Consultants

All Operation Directors

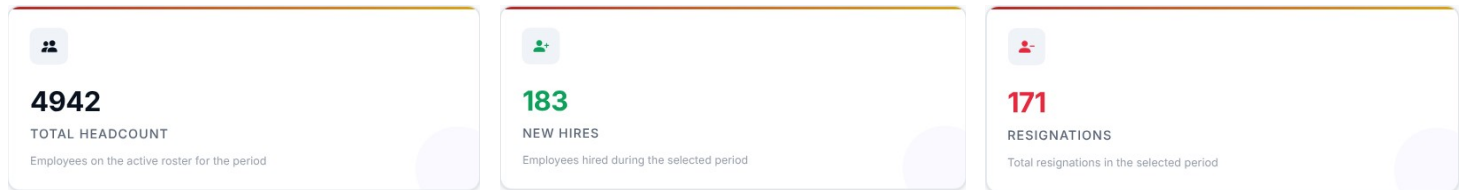

All Jobs

Reset Filters

Pick a Store, Operation Manager, Operation Consultant, Senior Operation Consultant, Operation Director or Job, and the cards and charts switch to that selection (the Store filter does not narrow the "Headcount by Store" table, which lists all the stores in your selection). Press Reset Filters to return to the full picture.

Good to know: when you pick a From/To range, Total Headcount, New Hires and Resignations are added up over the months of the range, and the breakdown charts add up each month in the range. The "Headcount by Store" table uses only the To month. The Headcount Over Time chart ignores the To month and always shows every month from the From year to the latest upload.

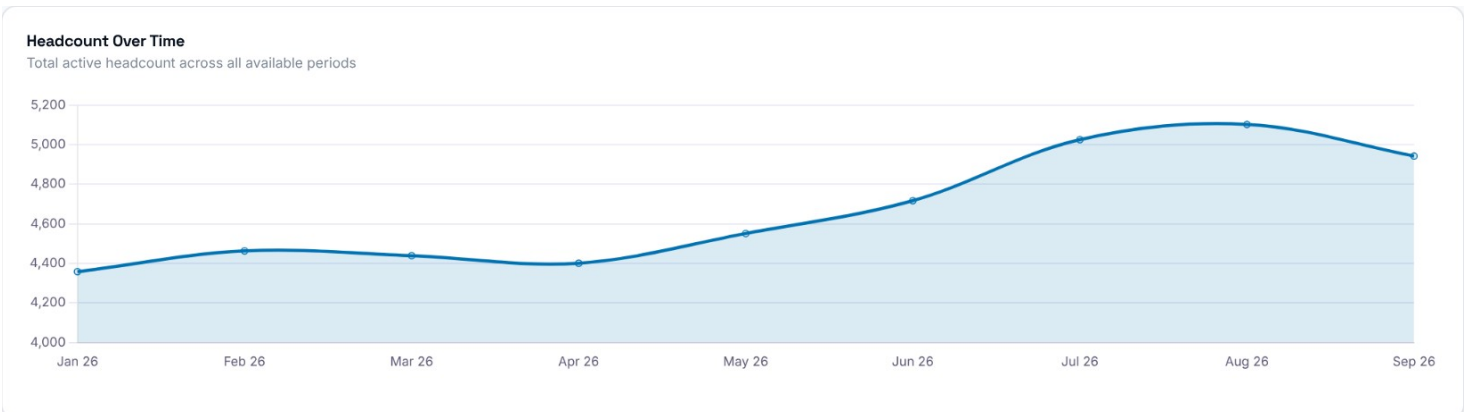

Step 2 - Read the headline numbers

What to look at: compare New Hires with Resignations.

Then decide: if resignations are higher than hires, your headcount is shrinking. Check the trend chart below to see whether this is new.

Step 3 - Is the headcount going the right way?

What to look at: the direction of the line over the year.

Then decide: a falling line means you are losing people faster than you add them. Use the filters to find which store or manager the drop comes from.

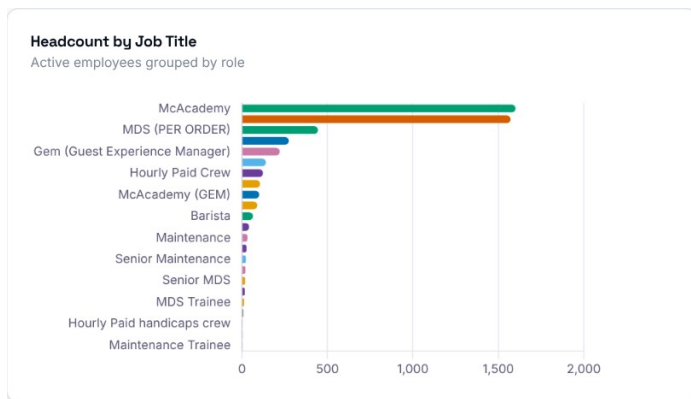

Step 4 - Is the team experienced enough?

What to look at: how tall the "< 3 months" and "3-6 months" bars are compared with "2+ years".

Then decide: a large share of new people means more coaching and closer follow-up. A team that is mostly 2+ years is stable, but check that you are still hiring for the future.

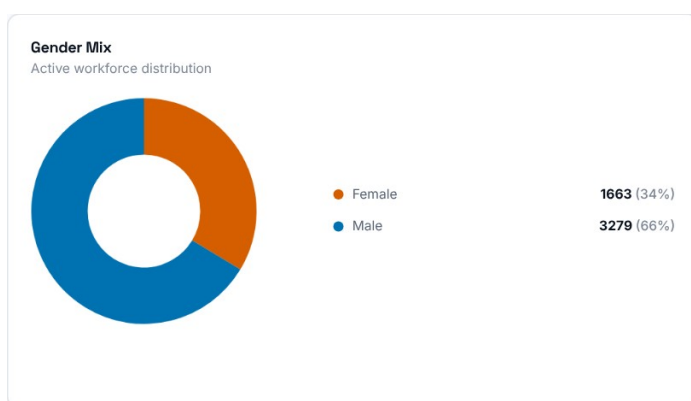

Step 5 - Who is on the team?

What to look at: which roles carry most of your headcount, and whether a role you depend on looks thin.

What to look at: the split between payroll groups.

What to look at: the gender split of the current team, with counts and percentages.

Step 6 - Which stores need attention?

Store Name	Headcount	Gender Mix	Payroll Group Mix
Store 13	68	Female 25% Male 75%	Hourly Paid 43% Manfoods Company 57%
Store 7	57	Female 32% Male 68%	Hourly Paid 56% Manfoods Company 44%
Store 86	52	Female 40% Male 60%	Hourly Paid 17% Manfoods Company 83%
Store 48	50	Female 24% Male 76%	Hourly Paid 28% Manfoods Company 72%
Store 152	50	Female 38% Male 62%	Hourly Paid 22% Manfoods Company 78%
Store 170	50	Female 24% Male 76%	Hourly Paid 52% Manfoods Company 48%
Store 1	48	Female 31% Male 69%	Hourly Paid 31% Manfoods Company 69%
Store 9	48	Female 33% Male 67%	Hourly Paid 65% Manfoods Company 35%
Store 19	47	Female 23% Male 77%	Hourly Paid 28% Manfoods Company 72%
Store 8	44	Female 27% Male 73%	Hourly Paid 39% Manfoods Company 61%

What to look at: each store's headcount, with its gender and payroll group mix.

Then decide: compare stores with each other. A store with a much smaller team than similar stores is worth a conversation with its manager.

Step 7 - Who should you talk to first?

Operation Consultants
 Headcount & Turnover% by consultant

Name	Stores	Headcount	Turnover%
Operation Consultant 20	8	218	6.7%
Operation Consultant 11	9	158	7.0%
Operation Consultant 16	7	187	6.4%
Operation Consultant 4	8	250	6.0%
Operation Consultant 1	7	150	6.0%
Operation Consultant 9	5	140	5.7%
Operation Consultant 22	7	155	4.5%
Operation Consultant 18	7	200	4.5%
Operation Consultant 25	8	231	4.3%
Operation Consultant 7	6	122	4.1%
Operation Consultant 19	10	215	3.3%
Operation Consultant 10	4	94	3.2%
Operation Consultant 21	8	256	3.1%
Operation Consultant 17	12	372	3.0%

Operation Directors
 Headcount & turnover by director

Name	Stores	Headcount	Turnover%
Operation Director 2	91	2309	3.8%
Operation Director 1	102	2614	3.2%

Operation Managers
 Headcount & turnover by manager

Name	Stores	Headcount	Turnover%
Operation Manager 1	42	988	3.3%
Operation Manager 2	51	1264	2.8%

Senior Operation Consultants
 Headcount & turnover by senior consultant

Name	Stores	Headcount	Turnover%
Senior Operation Consultant 1	21	505	5.0%
Senior Operation Consultant 2	25	706	4.7%
Senior Operation Consultant 3	24	615	3.4%

What to look at: Turnover% next to each person's headcount. It is weighted across all their stores, and the colored badge highlights the higher rates.

Then decide: start your conversations with the people whose Turnover% is highest, then filter the page by that person to see which of their stores drives it.

Workforce Planning

Where to find it: Side menu > Workforce Planning

Use this page to see whether you have the people you planned for. It compares the headcount you planned (the job projection) with the headcount that actually works for you, by job title and by store, for the month you pick. It shows where you are short, by how much, and roughly how many hires are needed. Only stores that have a projection for the month are compared.

Step 1 - Choose the month and your scope

2026

September

All stores

All job titles

All Operation Consultants

All Operation Managers

All Senior Operation Consultants

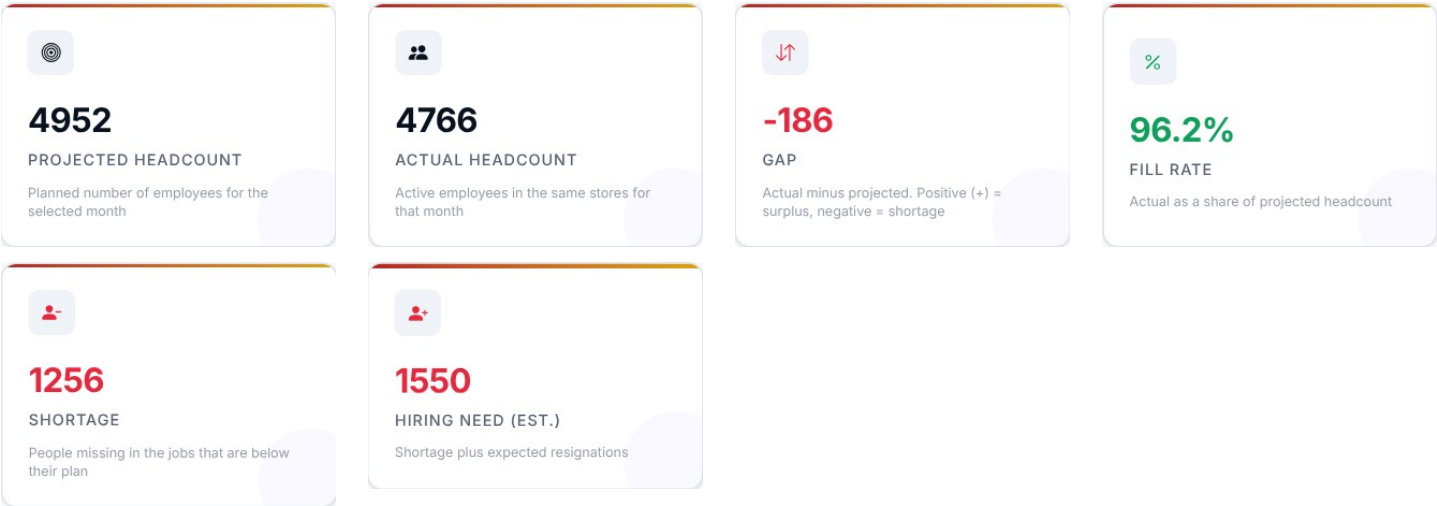

All Operation Directors

Reset Filters

Year and Month pick the period (only months that have a projection are listed). Store, Job title and the Operation Consultant / Manager / Senior Consultant / Director selectors narrow every number, chart and table on the page. You only see the stores you have access to.

Good to know: for a future month there is no active-employee roster yet, so the page shows the projection only.

Step 2 - Read the headline numbers

Card	What it shows
Projected Headcount	The planned number of employees for the selected month.
Actual Headcount	Active employees in the same stores for that month.
Gap	Actual minus projected. A positive (+) number is a surplus, a negative number is a shortage.
Fill Rate	Actual as a share of projected headcount.
Shortage	The people missing in the jobs that are below their plan. A surplus in one job never covers another (the two Crew Trainer jobs are the only exception: within a store they are counted together).
Hiring Need (est.)	The estimated hires required: the shortage plus the expected resignations.

What to look at: Fill Rate and Shortage first, then Gap.

Then decide: a low Fill Rate means you are short. Treat Hiring Need as your first estimate of how many people to recruit. Remember that the Gap can hide real shortages, because a job above its plan offsets a job below it - the Shortage card does not.

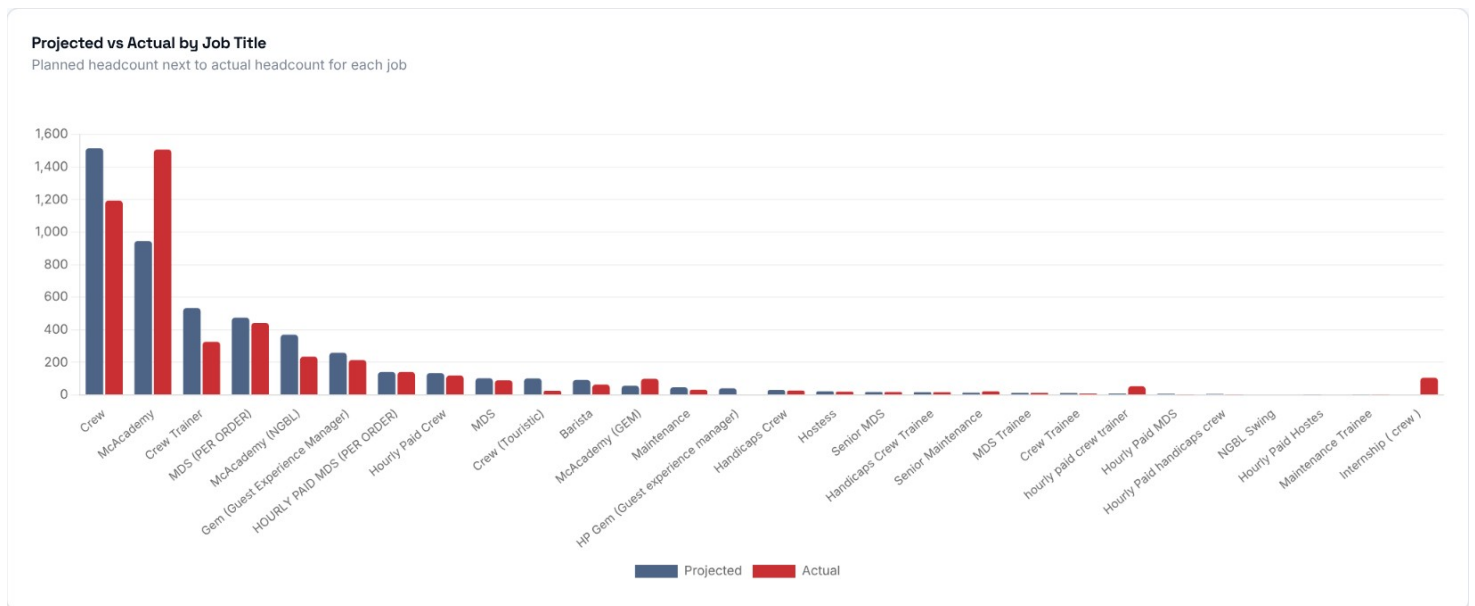

Step 3 - Read the Smart Insights

Automatic takeaways worked out from the numbers on this page for your current filters: overall staffing, the most understaffed store, the biggest shortage by job, the payroll group with the lowest fill rate, how many stores are below 95% of their projection (understaffed and watch), the estimated hiring need, the consultant whose stores have the lowest fill rate, stores above projection and next month's plan. They update whenever you change a filter.

Then decide: read these first for a quick summary, then use the charts and tables below to dig into each point.

Step 4 - Which jobs are short?

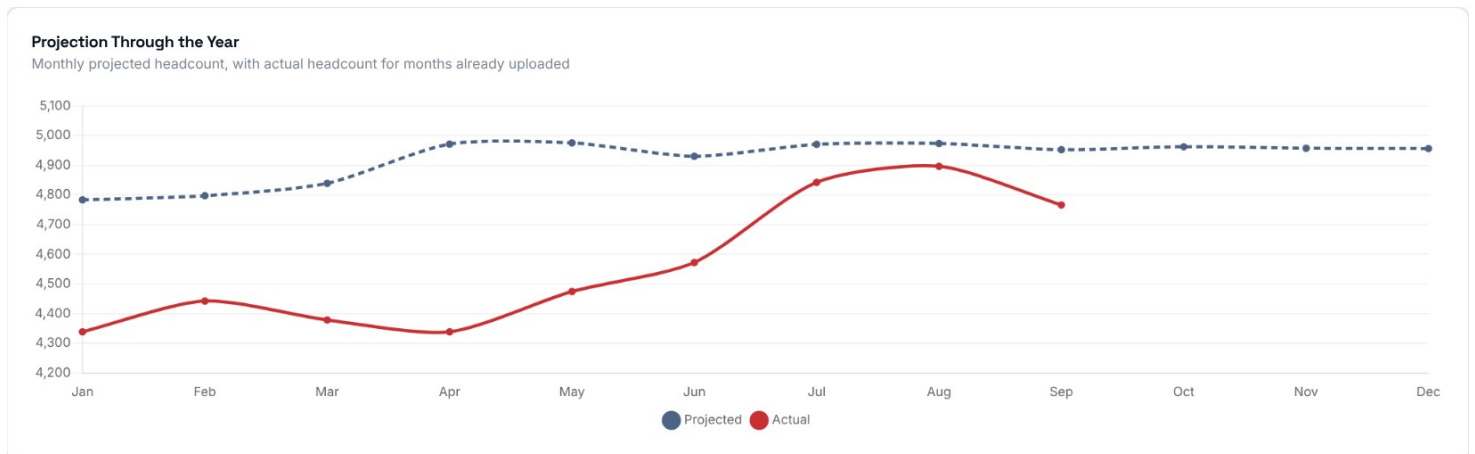

Planned and actual headcount side by side for each job title. Hover a bar to see the gap, fill rate and hiring need for that job.

What to look at: jobs where the actual bar is clearly lower than the planned bar.

Then decide: those are the jobs to prioritise in recruitment.

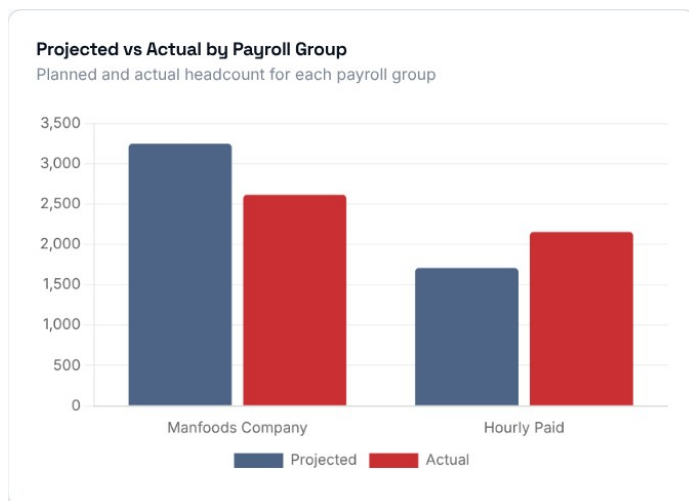

Step 5 - How is reality tracking against the plan?

Projected headcount for every month of the selected year that has a projection (dashed line) and actual headcount for the months that already have an uploaded roster (solid line).

What to look at: whether the solid line is moving towards the dashed line or away from it.

Step 6 - Payroll groups

Payroll Groups
Same figures in a table — click a header to sort

Name	Projected	Actual	Gap	Surplus	Shortage	Hiring need	Fill rate
Manfoods Company	3245	2612	-633	268	901	993	80.5%
Hourly Paid	1707	2154	+447	802	355	557	126.2%

Planned and actual headcount for each payroll group, with the same numbers in a table you can sort by clicking a header. A job that is not in the Job Payroll Groups list and that nobody works in yet has no known payroll group and is listed as Unassigned.

Step 7 - Which stores need attention?

Stores: Projected vs Actual

Stores with the largest shortage first

Store ▾	Operation Consultant ▾	Projected ▾	Actual ▾	Gap ▾	Surplus ▾	Shortage ▾	Expected resignations ▾ incl. people who leave in their first 90 days	Hiring need ▾	Fill rate ▾	Status ▾
> Store 10	Operation Consultant 19	19	2	-17	0	17	0	17	10.5%	Understaffed
> Store 113	Operation Consultant 20	39	22	-17	7	24	1	25	56.4%	Understaffed
> Store 130	Operation Consultant 8	31	20	-11	1	12	3	15	64.5%	Understaffed
> Store 143	Operation Consultant 11	27	17	-10	2	12	2	14	63%	Understaffed
> Store 24	Operation Consultant 24	44	35	-9	3	12	1	13	79.5%	Understaffed
> Store 101	Operation Consultant 14	24	15	-9	0	9	2	11	62.5%	Understaffed
> Store 27	Operation Consultant 24	36	28	-8	1	9	1	10	77.8%	Understaffed
> Store 31	Operation Consultant 16	35	27	-8	1	9	3	12	77.1%	Understaffed
> Store 127	Operation Consultant 22	30	22	-8	2	10	1	11	73.3%	Understaffed
> Store 5	Operation Consultant 6	30	23	-7	4	11	4	15	76.7%	Understaffed

Every store with a projection for the month, most negative Gap first. Click a column header to sort (click again to reverse). The search box also matches the consultant's name. Click a store to open its jobs and see where its numbers come from.

Status	Fill rate
On track	95-100% filled
Watch	85-95% filled
Understaffed	below 85% filled
Overstaffed	above 100% filled

What to look at: stores marked Understaffed, then check their Shortage and Hiring need.

Then decide: open the store to see which jobs are missing people, and discuss a hiring plan with its Operation Consultant.

The numbers are calculated like this:

▼

How these numbers are calculated

- Gap = Actual – Projected for the whole row. A job above its plan offsets a job below it, so the gap can hide real shortages.
- Surplus = people above the plan, counted only in the jobs that are over. Shortage = people missing, counted only in the jobs that are short. So Gap = Surplus – Shortage, always.
- Expected resignations = the average monthly resignations of the last 6 roster months. It already includes people who leave in their first 90 days.
- Hiring need = Shortage + Expected resignations: the people needed to reach the plan, plus the people expected to leave.

Step 8 - Who should you talk to?

 Operation Consultants Projected vs actual headcount by consultant										
Name ▼	Stores ▼	Projected ▼	Actual ▼	Gap ▼	Surplus ▼	Shortage ▼	Expected resignations ▼ incl. people who leave in their first 90 days	Hiring need ▼	Fill rate ▼	Status ▼
Operation Consultant 20	8	253	218	-35	51	86	18	104	86.2%	Watch
Operation Consultant 11	8	173	142	-31	21	52	9	61	82.1%	Understaffed
Operation Consultant 24	8	242	216	-26	26	52	11	63	89.3%	Watch
Operation Consultant 6	8	224	199	-25	43	68	15	83	88.8%	Watch
Operation Consultant 14	8	154	132	-22	33	55	10	65	85.7%	Watch
Operation Consultant 25	8	250	231	-19	43	62	13	75	92.4%	Watch
Operation Consultant 1	7	168	150	-18	31	49	11	60	89.3%	Watch
Operation Consultant 10	4	110	94	-16	17	33	5	38	85.5%	Watch
Operation Consultant 8	8	195	180	-15	54	69	12	81	92.3%	Watch
Operation Consultant 17	9	345	330	-15	62	77	16	93	95.7%	On track

 Operation Directors Projected vs actual headcount by director										
Name ▼	Stores ▼	Projected ▼	Actual ▼	Gap ▼	Surplus ▼	Shortage ▼	Expected resignations ▼ incl. people who leave in their first 90 days	Hiring need ▼	Fill rate ▼	Status ▼
Operation Director 1	98	2634	2508	-126	589	715	159	874	95.2%	On track
Operation Director 2	88	2318	2258	-60	481	541	134	675	97.4%	On track

 Operation Managers Projected vs actual headcount by manager										
Name ▼	Stores ▼	Projected ▼	Actual ▼	Gap ▼	Surplus ▼	Shortage ▼	Expected resignations ▼ incl. people who leave in their first 90 days	Hiring need ▼	Fill rate ▼	Status ▼
Operation Manager 2	45	1239	1158	-81	236	317	60	377	93.5%	Watch
Operation Manager 1	40	1001	954	-47	175	222	52	274	95.3%	On track

 Senior Operation Consultants Projected vs actual headcount by senior consultant										
Name ▼	Stores ▼	Projected ▼	Actual ▼	Gap ▼	Surplus ▼	Shortage ▼	Expected resignations ▼ incl. people who leave in their first 90 days	Hiring need ▼	Fill rate ▼	Status ▼
Senior Operation Consultant 2	24	735	689	-46	136	182	40	222	93.7%	Watch
Senior Operation Consultant 1	21	505	505	0	155	155	44	199	100%	On track
Senior Operation Consultant 3	24	582	615	+33	170	137	42	179	105.7%	Overstaffed

The same figures rolled up by the people responsible for the stores: Operation Consultants, Directors, Managers and Senior Consultants. Each row shows how many stores it covers, their projected and actual headcount, the gap, the shortage, the expected resignations, the hiring need and a bar showing the fill rate.

Bar colour	Fill rate
Green	95-100%
Amber	85-95%
Red	below 85%
Blue	above 100%

Then decide: start with the people whose bar is red, then filter the page by that person to see their stores.

Hiring Forecast

Where to find it: Side menu > Hiring Forecast

Use this page to plan recruitment ahead. It shows how many people each store needs to hire in each month of the year. The figures are an estimate based on past resignations and the projection - they are not a hiring order, and they change as new employee lists and projections are uploaded.

Step 1 - Choose your scope

2026

All months

All stores

All job titles

All Operation Consultants

All Operation Managers

All Senior Operation Consultants

All Operation Directors

Reset Filters

Year, Store, Job title and the Operation Consultant / Manager / Senior Consultant / Director selectors narrow the table and its totals. You only see the stores you have access to.

Good to know: the Month filter focuses the summary cards, the Smart Insights and the jobs card on one month, and highlights that month in the monthly chart (the other bars fade). The main table and the leader tables always show the whole year.

Step 2 - Read the summary cards

14180
HIRES NEEDED IN THE YEAR
Total of all stores and months shown

Aug (1580)
BUSIEST MONTH
The month with the most hires

1712
NEXT 3 MONTHS
Hires needed in the coming three months

Store 113 (239)
STORE WITH MOST HIRES
Highest total over the year

Card	What it shows
Hires needed in the year	Total of all stores and months shown.
Busiest month	The month with the most hires.
Next 3 months	Hires needed in the coming three months (from this month on when you look at the current year).
Store with most hires	The store with the highest total over the year. It only shows when the table is viewed by store.

Then decide: plan your recruitment capacity around the busiest month and the next three months.

Step 3 - Read the Smart Insights

**Busiest month: August**
August needs 1580 hires, 11% of all the hires shown.

**The next 3 months are below average**
About 571 hires a month are needed in the next 3 months, against 1182 a month over the whole period (52% fewer).

**Monthly hiring falls through the year**
From Jan (1124 hires) to Dec (189 hires): 83% fewer.

**The top 5 take 7% of the hires**
Store 113 (239), Store 13 (226), Store 166 (171), Store 149 (163), Store 44 (150).

**Most hires: Operation Consultant 20**
Operation Consultant 20's stores need 911 hires, 6% of the total, across 8 store(s).

**4 store(s) need no hires**
They are at or above their projection in the period shown.

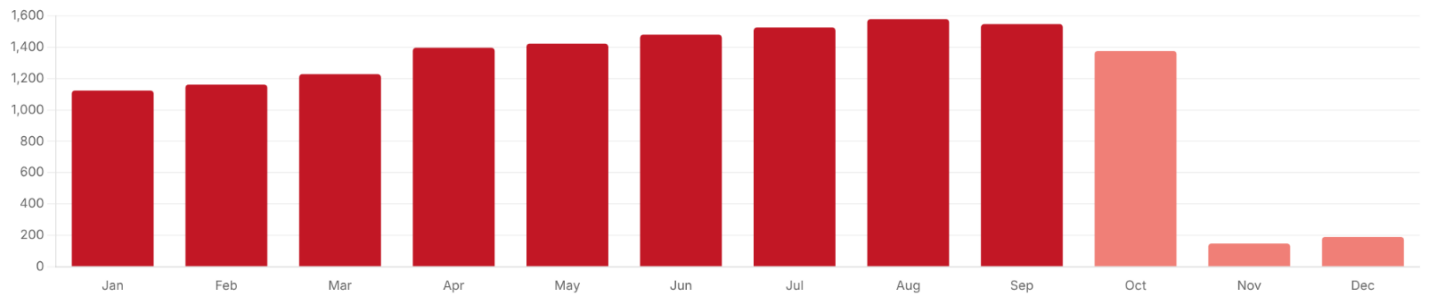

A few plain sentences worked out from the table: the busiest month, whether the next 3 months are above or below the monthly average, whether monthly hiring rises or falls through the year, how concentrated the hiring is, and the consultant whose stores need the most hires. They follow your filters and the "View by" choice.

Step 4 - When are the hires needed?

Hires needed per month

Dark bars use the uploaded employee list; light bars are forecast

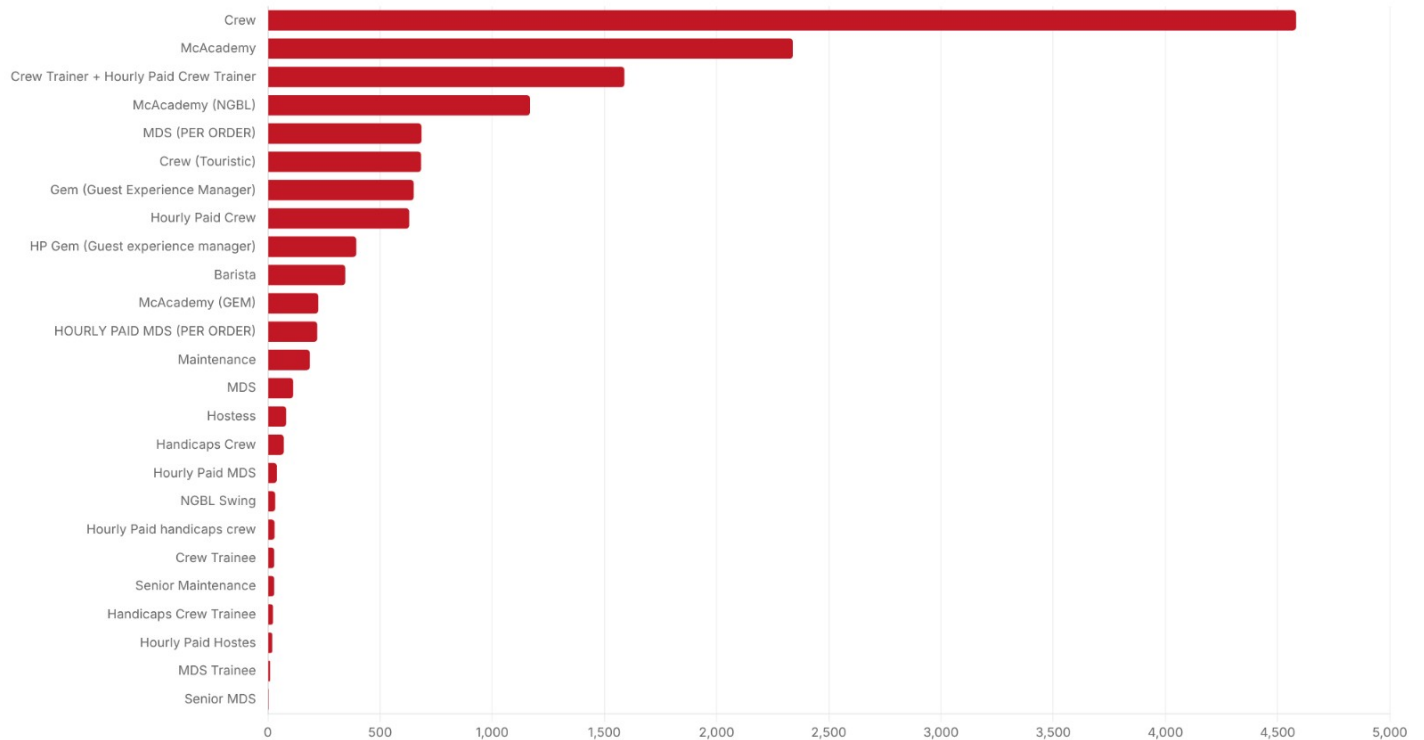

Hires needed in each month. Dark bars are months that already have an uploaded employee list; light bars are forecast. Hover a bar to see the month and its number.

What to look at: which months stand out, and how the light (forecast) bars compare with the dark ones.

Step 5 - Which jobs do you need to hire for?

Hires needed by job title

Follows the filters above. Pick a month to see the jobs to hire for in that month; otherwise the whole year. Jobs that need no hires are hidden.

Job title	Jan Roster	Feb Roster	Mar Roster	Apr Roster	May Roster	Jun Roster	Jul Roster	Aug Roster	Sep Roster	Oct Forecast	Nov Forecast	Dec Forecast	Total
Crew	308	348	394	488	495	494	506	505	466	454	61	63	4582
McAcademy	239	223	234	262	240	204	193	230	246	95	68	106	2340
Crew Trainer + Hourly Paid Crew Trainer	121	113	118	134	142	183	190	193	190	194	5	6	1589
McAcademy (NGBL)	69	76	86	89	103	140	148	152	146	146	7	6	1168
MDS (PER ORDER)	63	62	64	64	64	64	77	74	74	79	0	0	685

Hires needed by job title, following the filters above. Pick a month to see the jobs to hire for in that month; otherwise the whole year is shown. Jobs that need no hires are hidden.

Step 6 - Read the main table

Hires needed per store

Each cell is the number of people to hire in that month to reach the projection

View by: Store

Search stores...

Store	Operation Consultant	Jan Roster	Feb Roster	Mar Roster	Apr Roster	May Roster	Jun Roster	Jul Roster	Aug Roster	Sep Roster	Oct Forecast	Nov Forecast	Dec Forecast	Total
Store 113	Operation Consultant 20	22	22	22	25	23	23	24	26	25	25	1	1	239
Store 13	Operation Consultant 17	15	17	18	23	25	24	24	29	25	20	2	4	226
Store 166	Operation Consultant 6	12	12	14	16	17	18	23	21	20	18	0	0	171
Store 149	Operation Consultant 18	13	13	14	16	16	17	18	19	19	16	1	1	163
Store 44	Operation Consultant 16	11	11	16	15	16	17	18	16	16	14	0	0	150
Store 183	Operation Consultant 4	12	14	13	16	12	11	12	13	17	17	2	2	141
Store 132	Operation Consultant 8	12	10	10	15	14	16	16	16	14	15	1	1	140
Store 75	Operation Consultant 6	13	12	10	11	13	17	17	17	15	13	1	1	140
Store 51	Operation Consultant 18	13	15	16	19	19	13	12	10	10	9	1	1	138
Store 130	Operation Consultant 8	13	11	10	12	14	12	15	15	15	14	2	3	136
Store 95	Operation Consultant 22	8	9	12	11	15	13	14	13	15	13	3	5	131
Store 15	Operation Consultant 17	11	11	11	13	15	17	17	15	11	10	0	0	131
Store 4	Operation Consultant 16	8	7	10	13	12	12	17	17	18	15	1	1	131

Each cell is the number of people to hire in that month to reach the projection. Use "View by" above the table to group the rows by store (with its Operation Consultant), job, payroll group or Operation Consultant - the totals stay the same, only the grouping changes.

- One column per month and a Total at the end. The last row adds up every row.
- The darker the red, the more hires that month. A dash means there is nothing to forecast for that month: the projection has no data for it, or there is no employee list to start from.
- "Roster" months use the uploaded employee list; "Forecast" months are estimated from the latest roster.
- Click a column title to sort, and use the search box to find a row.

Then decide: start with the stores at the top (largest total) and the darkest months, and agree a recruitment plan with the responsible Operation Consultant.

Good to know: for months that already have an uploaded employee list, hires = shortage + expected resignations (per store and job, as on Workforce Planning). Later months are simulated from the latest list: people expected to resign

leave, then hires fill up to that month's projection. Expected resignations already include people who leave in their first 90 days.

Step 7 - Who is responsible?

 Operation Consultants Hires needed per month by consultant														
Name ▾	Stores ▾	Jan ▾ Roster	Feb ▾ Roster	Mar ▾ Roster	Apr ▾ Roster	May ▾ Roster	Jun ▾ Roster	Jul ▾ Roster	Aug ▾ Roster	Sep ▾ Roster	Oct ▾ Forecast	Nov ▾ Forecast	Dec ▾ Forecast	Total ▾
Operation Consultant 20	8	79	79	79	86	83	86	95	101	104	95	10	14	911
Operation Consultant 17	9	60	70	74	93	103	101	97	102	93	83	6	9	891

The same hires per month, rolled up by Operation Consultant, Director, Manager and Senior Consultant, with the number of stores each covers. These tables are always grouped by store, whatever "View by" is set to.

Crew Trainers

Where to find it: Side menu > Crew Trainers

Use this page to check whether your stores have enough Crew Trainers. It compares the trainers you have with the rule of one trainer for every 6 crew-level employees, and with the projection, and shows who joined or left the trainer list.

Step 1 - Choose the month and your scope

2026

September

All stores

All Operation Consultants

All Operation Managers

All Senior Operation Consultants

All Operation Directors

Reset Filters

Year and Month pick one of the months that have an uploaded trainer list. Store and the Operation Consultant / Manager / Senior Consultant / Director selectors narrow every number and table on the page. You only see the stores you have access to.

Step 2 - Read the summary cards

378 / 539

TRAINERS VS THE RULE

Actual trainers / trainers required (1 per 6 crew level)

3129

CREW LEVEL

Crew-level employees on the roster, trainers excluded

378 / 540

TRAINERS VS PLAN

Actual trainers / trainers in the projection

64

TRAINERS WHO RESIGNED

Trainers who resigned in the last 6 months

Card	What it shows
Trainers vs the rule	Actual trainers over the trainers required (one per 6 crew-level employees).
Crew level	Roster employees in jobs marked Crew Level in Job Payroll Groups, trainers excluded.
Trainers vs plan	Actual trainers over the trainers in the projection.
Trainers who resigned	Trainers who were on a trainer list and resigned in the last 6 roster months.

What to look at: Trainers vs the rule first - when the first number is lower than the second you have fewer trainers than the rule asks for.

Step 3 - Read the Smart Insights

Trainers are 70% of the rule

378 trainers against 539 required for 3129 crew-level employees (one per 6).

113 store(s) are short of trainers

missing in total. Most short: Store 13 (-6), Store 7 (-4), Store 58 (-4).

22 store(s) have more trainers than the rule

Most above: Store 27 (+2), Store 80 (+2), Store 82 (+2).

Extra trainers could close 26 of the gap

26 extra trainers sit in 22 store(s) above the rule while 187 are missing in 113 store(s). Moving some would cover part of the gap.

The projection plans rose trainers than the rule asks for

The projection has 540 trainers; the rule asks for 539 (1 difference).

Trainers fell since the first list

From January (447) to September (378): 15% change.

4 joined the trainer list, 6 left

Of those who left, 3 resigned and 2 are still working but off the list (compared with the August list).

64 trainer(s) resigned in 6 months

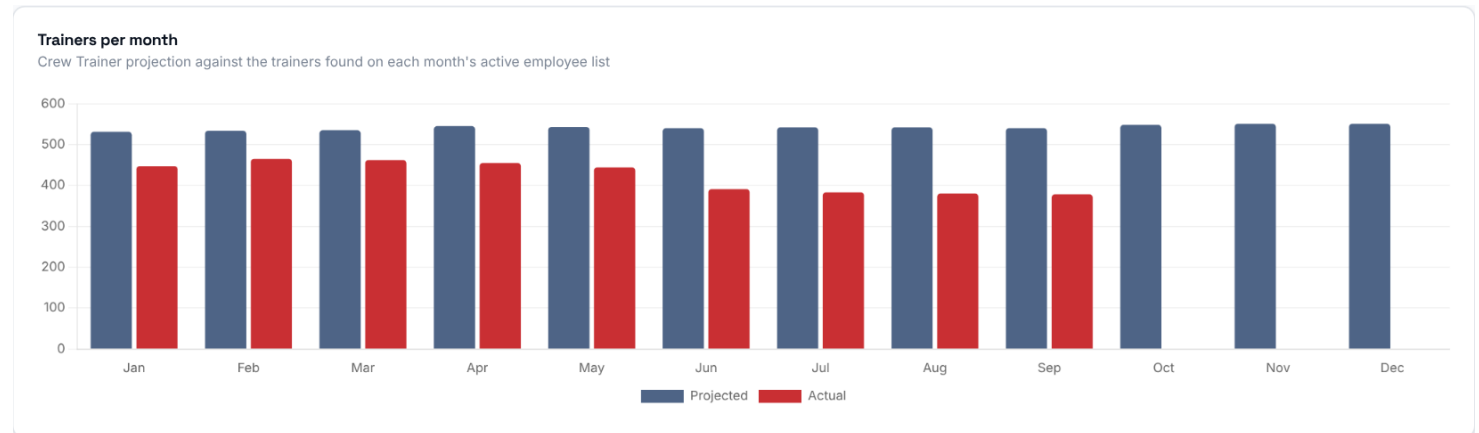

About 17% of today's trainers.

Plain sentences worked out from the numbers on the page: trainers against the rule, the stores most short or above it, whether extra trainers could cover gaps, how the list changed and how many trainers resigned. They follow your filters.

Page 16

Then decide: if some stores have extra trainers while others are short, consider moving trainers between them before recruiting new ones.

Step 4 - How are trainers moving through the year?

Projected against actual Crew Trainers for each month that has a projection. Actual is the people on the uploaded list who are also on that month's active employee list; a month without a roster has no actual bar.

What to look at: whether the actual bar follows the projected bar or falls away from it.

Step 5 - How many stores are short?

Stores with enough trainers vs short
Stores grouped by actual trainers against the rule (one trainer per 6 crew-level employees)

Status	Stores	Crew level	Required (1 per 6)	Actual	Gap vs rule	Projected	Gap vs plan
No trainers	12	204	34	0	-34	28	-28
Short of trainers	101	1950	340	187	-153	312	-125
Enough trainers	46	690	118	118	0	134	-16
Over	22	284	47	73	+26	64	+9
Not needed	1	1	0	0	0	2	-2
Total	182	3129	539	378	-161	540	-162

Stores grouped by how many trainers they have against the rule: Over (more than required), Enough (exactly), Short (fewer), No trainers (required but none) and Not needed (none required and none present). Each group shows its stores, crew level, required, actual, gap vs rule, projected and gap vs plan.

What to look at: the No trainers and Short groups.

Step 6 - Which stores need trainers?

Column	Meaning
Crew level	The people the trainers train.
Required	Crew level divided by 6, rounded to the nearest whole number (a half rounds up).
Actual	Actual trainers in the store.
Gap vs rule	Actual minus required. Negative = short of trainers, positive = over.
Projected / Gap vs plan	The trainers in the projection, and actual minus projected.
Status	Over, Enough, Short, No trainers, or Not needed (none required and none present).

Trainers by store

Stores most short of trainers (by the rule) come first

Search stores...

Store ▾	Operation Consultant ▾	Crew level ▾	Required (1 per 6) ▾	Actual ▾	Gap vs rule ▲	Projected ▾	Gap vs plan ▾	Status ▾
Store 13	Operation Consultant 17	46	8	2	-6	4	-2	Short of trainers
Store 7	Operation Consultant 9	35	6	2	-4	6	-4	Short of trainers
Store 58	Operation Consultant 26	22	4	0	-4	2	-2	No trainers
Store 81	Operation Consultant 18	24	4	0	-4	3	-3	No trainers
Store 95	Operation Consultant 22	24	4	0	-4	4	-4	No trainers
Store 115	Operation Consultant 26	26	4	0	-4	4	-4	No trainers
Store 138	Operation Consultant 23	27	5	1	-4	3	-2	Short of trainers
Store 149	Operation Consultant 18	26	4	0	-4	4	-4	No trainers
Store 9	Operation Consultant 21	28	5	2	-3	3	-1	Short of trainers
Store 14	Operation Consultant 25	27	5	2	-3	4	-2	Short of trainers
Store 15	Operation Consultant 17	24	4	1	-3	4	-3	Short of trainers
Store 36	Operation Consultant 16	21	4	1	-3	2	-1	Short of trainers
Store 123	Operation Consultant 23	16	3	0	-3	3	-3	No trainers
Store 125	Operation Consultant 22	28	5	2	-3	3	-1	Short of trainers

Stores with a projection for the month are listed, most short come first. Click a column title to sort, and use the search box to find a store or a consultant.

Then decide: agree with the responsible Operation Consultant how the top stores will reach the required number of trainers.

Step 7 - Who joined or left the trainer list?

Trainer list changes

Compared with the August 2026 list

Joined the list (4)

Name	Store
Employee 1	Store 31
Employee 2	Store 32
Employee 3	Store 35
Employee 4	Store 57

Left the list (6)

Name	Store	
Employee 5	Store 7	Resigned
Employee 6	Store 40	Resigned
Employee 7	Store 131	Resigned
Employee 8	Store 77	Still working, off the list
Employee 9	Store 141	Still working, off the list
Employee 10	Store 165	Not on the roster

Who joined and who left the trainer list compared with the previous uploaded list. For people who left, the status tells you why: Resigned (they appear in the resignations), Still working, off the list (still on this month's active list, so the allowance was removed or they moved), or Not on the roster.

What to look at: people marked "Still working, off the list" - they may be trainers that moved or lost their allowance by mistake.

Step 8 - Who is responsible?

 Operation Consultants Trainers against the rule and the plan by consultant								
Name	Stores	Crew level	Required (1 per 6)	Actual	Gap vs rule	Projected	Gap vs plan	Status
Operation Consultant 17	9	205	37	23	-14	27	-4	Short of trainers
Operation Consultant 18	7	158	26	13	-13	24	-11	Short of trainers
Operation Consultant 3	8	141	25	16	-9	21	-5	Short of trainers
Operation Consultant 22	7	118	20	11	-9	22	-11	Short of trainers
Operation Consultant 23	8	142	26	17	-9	24	-7	Short of trainers
Operation Consultant 25	8	150	26	17	-9	25	-8	Short of trainers
Operation Consultant 5	7	111	19	11	-8	17	-6	Short of trainers
Operation Consultant 6	7	134	23	15	-8	27	-12	Short of trainers

Operation Consultant 20	8	160	26	19	-7	27	-8	Short of trainers
Operation Consultant 21	8	152	26	19	-7	25	-6	Short of trainers

 Operation Directors Trainers against the rule and the plan by director								
Name	Stores	Crew level	Required (1 per 6)	Actual	Gap vs rule	Projected	Gap vs plan	Status
Operation Director 1	94	1665	289	197	-92	283	-86	Short of trainers
Operation Director 2	88	1464	250	181	-69	257	-76	Short of trainers

 Operation Managers Trainers against the rule and the plan by manager								
Name	Stores	Crew level	Required (1 per 6)	Actual	Gap vs rule	Projected	Gap vs plan	Status
Operation Manager 2	43	743	131	89	-42	113	-24	Short of trainers
Operation Manager 1	40	626	106	78	-28	107	-29	Short of trainers

 Senior Operation Consultants Trainers against the rule and the plan by senior consultant								
Name	Stores	Crew level	Required (1 per 6)	Actual	Gap vs rule	Projected	Gap vs plan	Status
Senior Operation Consultant 1	21	378	64	37	-27	65	-28	Short of trainers
Senior Operation Consultant 2	24	454	78	55	-23	76	-21	Short of trainers
Senior Operation Consultant 3	24	384	66	48	-18	74	-26	Short of trainers

The same figures rolled up by Operation Consultant, Director, Manager and Senior Consultant, with the number of stores each covers.

Turnover

Where to find it: Side menu > Turnover

Use this page to understand who is leaving and where. It tracks how many employees resigned and how that compares with headcount, broken down by month, job title, tenure, payroll group, gender and store. The cards at the top summarise the selected period; everything below drills into it.

Step 1 - Choose the period and your scope

Turnover Analysis

Deep-dive into resignation patterns and store performance

FROM

TO

STORE NAME

OPERATION CONSULTANT

SENIOR OPERATION CONSULTANTS

September 2026

September 2026

All Stores

All Operation Managers

All Operation Consultants

All Senior Operation Consultants

OPERATION DIRECTORS

JOB TITLE

Reset Filters

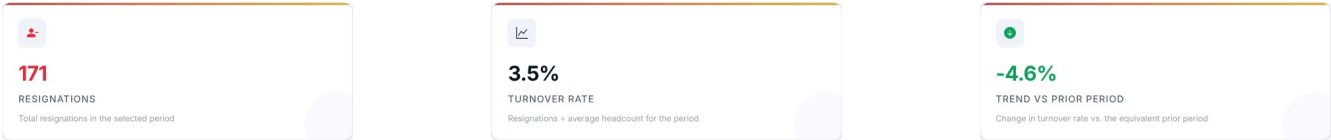

All Operation Directors

All Jobs

Pick a Store, Operation Manager, Operation Consultant, Senior Operation Consultant or Operation Director or Job and the cards, the charts and the matrix switch to that selection. The Store filter does not narrow the store table, the Operation Consultant / Director / Manager / Senior Consultant tables, or the Trend vs Prior Period card, which always cover all the stores you can access. The From/To period narrows the cards, the job title / tenure / payroll / gender charts, the store table and the leader tables.

Good to know: the "Turnover Rate by Month" chart always shows every uploaded month. The "Monthly Turnover Trend" chart and the full matrix always show every month from the From year to the latest upload, whatever From/To month you pick, because they are built to show trends over time.

Step 2 - Read the headline numbers

Card	What it shows
Resignations	Total resignations in the selected period.
Turnover Rate	Resignations divided by the average headcount for the period.
Trend vs Prior Period	The change in turnover rate compared with the equivalent prior period.

What to look at: Turnover Rate and its trend. A green downward arrow means turnover improved against the prior period.

Step 3 - Is turnover seasonal?

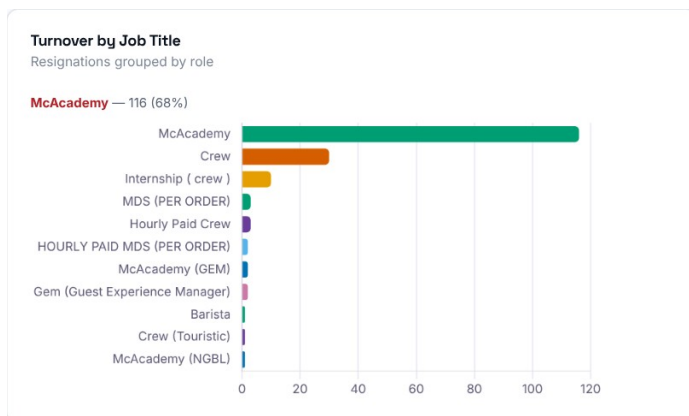

Turnover rate for every uploaded month (one bar per month and year). Each bar = (resignations that month / headcount that month) x 100. This chart ignores the From/To filter, so you can see long-term seasonality; the Store, leader and Job filters still apply.

What to look at: months that regularly stand out.

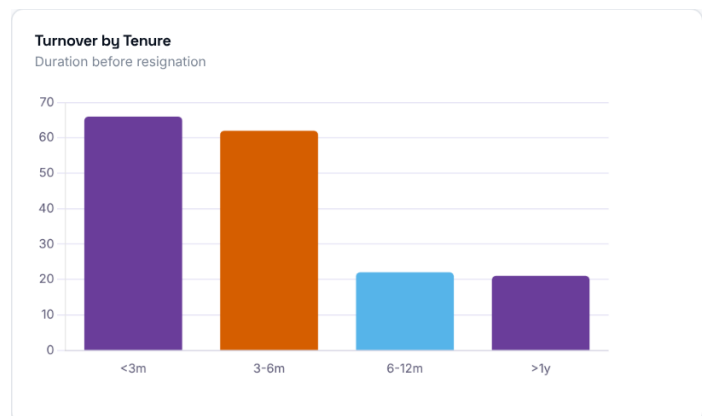

Then decide: prepare extra hiring and retention effort ahead of the months that are usually worst.

Step 4 - Who is leaving?

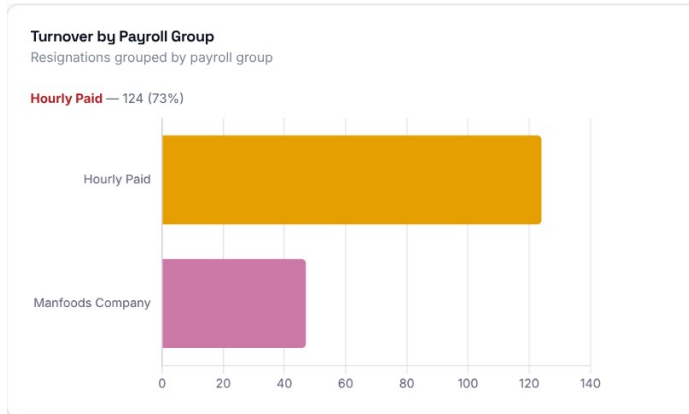

Resignations in the selected period grouped by job title.

What to look at: which roles are losing the most people.

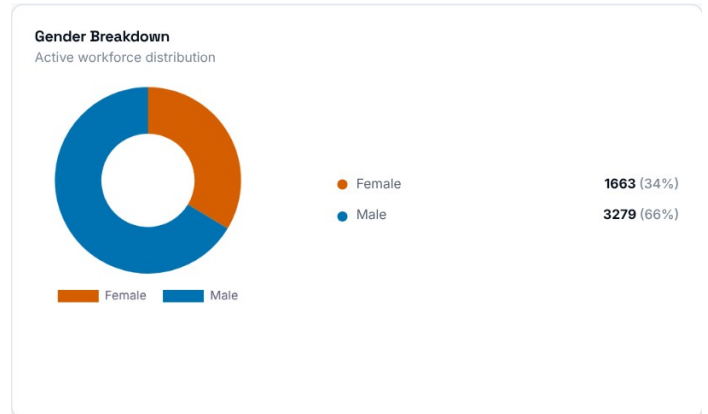

Resignations grouped by how long the employee had worked (under 3 months, 3-6 months, and so on).

What to look at: whether people leave early or after a longer stay.

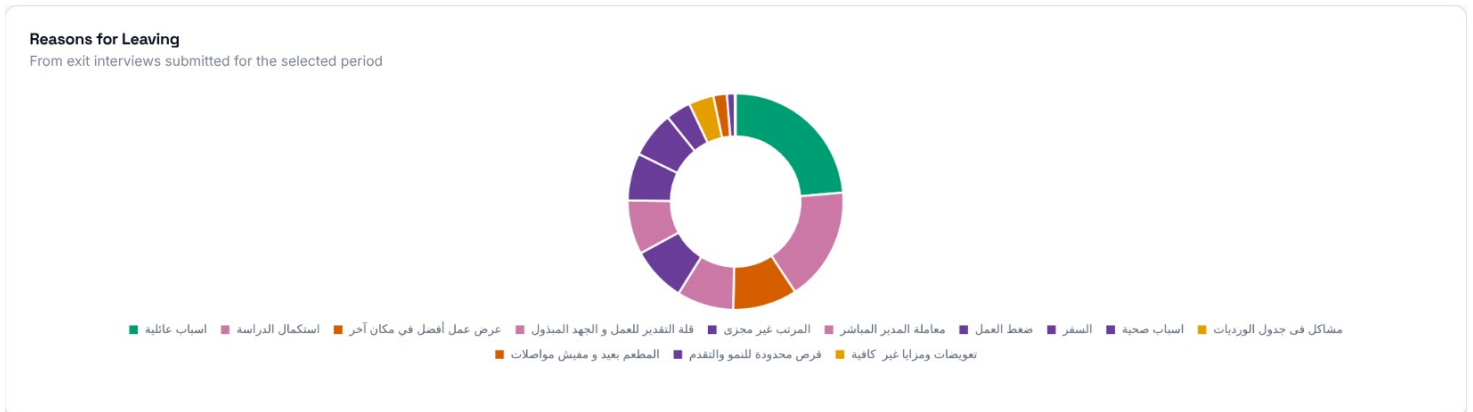

Resignations grouped by payroll group for the selected period.

Gender split of the active employees in the selected period (each month in the From-To range added together), shown as a doughnut with counts and percentages on the side.

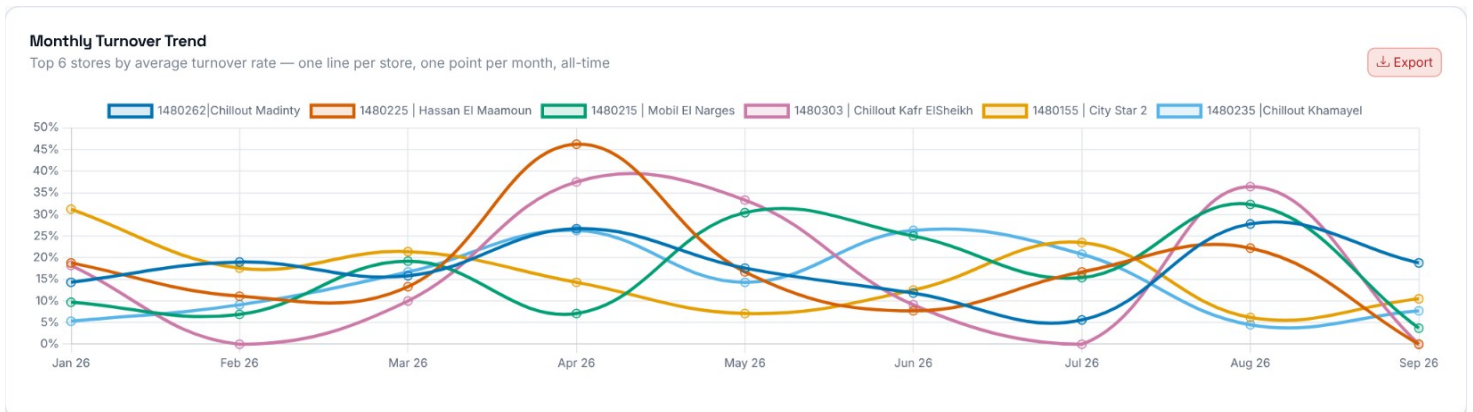

Step 5 - Why are they leaving?

The reasons given in exit interviews, grouped by reason. Only employees who completed an exit interview are counted, not every resignation. The period filter applies only when From and To are in the same year; otherwise all exit interviews are used.

Then decide: the biggest reason is where your retention effort should go first.

Step 6 - Is the trend improving?

Month-by-month turnover rate of the 6 stores with the highest average rate (or of the selected store), from the From year to the latest upload, whatever To period you pick.

Step 7 - Which stores lose the most people?

Store Name ↕	OC ↕	OM ↕	Headcount ↕	New Hires ↕	Resignations ↕	Turnover% ↕
Store 120	Operation Consultant 20	—	10	+1	3	30.0%
Store 143	Operation Consultant 11	Operation Manager 1	17	+1	4	23.5%
Store 61	Operation Consultant 11	Operation Manager 1	10	+1	2	20.0%
Store 139	Operation Consultant 4	—	16	+2	3	18.8%
Store 197	Operation Consultant 11	Operation Manager 1	16	+2	3	18.8%
Store 126	Operation Consultant 1	—	19	+1	3	15.8%
Store 3	Operation Consultant 25	Operation Manager 1	35	+3	5	14.3%
Store 131	Operation Consultant 7	—	14	+0	2	14.3%
Store 147	Operation Consultant 20	—	28	+0	4	14.3%
Store 101	Operation Consultant 14	Operation Manager 2	15	+0	2	13.3%

Every store with employees in the selected period, with its headcount (added up over the months of the range), new hires, resignations and turnover rate (resignations / average headcount x 100). Rows start sorted by Turnover% (highest first). Click a column header to sort.

What to look at: stores with the highest Turnover% and with resignations well above their new hires.

Then decide: talk to the Operation Consultant of the stores at the top and agree actions with them.

Step 8 - Who should you talk to?

 Operation Consultants Ranked by weighted turnover rate				
Name	Stores	Headcount	Resignations	Turnover%
▲ Operation Consultant 20	8	218	19	8.7%
▲ Operation Consultant 11	9	158	11	7.0%
• Operation Consultant 16	7	187	12	6.4%
• Operation Consultant 4	8	250	15	6.0%
• Operation Consultant 1	7	150	9	6.0%
• Operation Consultant 9	5	140	8	5.7%
• Operation Consultant 22	7	155	7	4.5%
• Operation Consultant 18	7	200	9	4.5%
• Operation Consultant 25	8	231	10	4.3%
• Operation Consultant 7	6	122	5	4.1%
• Operation Consultant 19	10	215	7	3.3%
• Operation Consultant 10	4	94	3	3.2%
• Operation Consultant 21	8	256	8	3.1%
• Operation Consultant 17	12	372	11	3.0%

 Operation Directors Ranked by weighted turnover rate				
Name	Stores	Headcount	Resignations	Turnover%
▲ Operation Director 2	91	2309	87	3.8%
▲ Operation Director 1	102	2614	83	3.2%

 Operation Managers Ranked by weighted turnover rate				
Name	Stores	Headcount	Resignations	Turnover%
▲ Operation Manager 1	42	988	33	3.3%
▲ Operation Manager 2	51	1264	35	2.8%

 Senior Operation Consultants Ranked by weighted turnover rate				
Name	Stores	Headcount	Resignations	Turnover%
▲ Senior Operation Consultant 1	21	505	25	5.0%
▲ Senior Operation Consultant 2	25	706	33	4.7%
• Senior Operation Consultant 3	24	615	21	3.4%

Operation Consultants, Directors, Managers and Senior Consultants ranked by their weighted average turnover rate: the sum of resignations across all their stores divided by the sum of average headcount across those stores - not a simple average of each store's rate.

Step 9 - Spot the pattern store by store

OC ↕	Store ↕	Jan 26 ↕	Feb 26 ↕	Mar 26 ↕	Apr 26 ↕	May 26 ↕	Jun 26 ↕	Jul 26 ↕	Aug 26 ↕	Sep 26 ↕	TOTAL ↕
Operation Consultant 4	Store 139	14.3%	19.0%	15.8%	26.7%	17.6%	11.8%	5.6%	27.8%	18.8%	157.4%
Operation Consultant 14	Store 104	18.8%	11.1%	13.3%	46.2%	16.7%	7.7%	16.7%	22.2%	0.0%	152.7%
Operation Consultant 22	Store 95	9.7%	6.9%	19.2%	7.1%	30.4%	25.0%	15.4%	32.3%	3.7%	149.7%
Operation Consultant 2	Store 180	18.2%	0.0%	10.0%	37.5%	33.3%	9.1%	0.0%	36.4%	0.0%	144.5%
Operation Consultant 16	Store 44	31.2%	17.6%	21.4%	14.3%	7.1%	12.5%	23.5%	6.2%	10.5%	144.3%
Operation Consultant 20	Store 114	5.3%	9.1%	16.7%	26.3%	14.3%	26.3%	20.8%	4.5%	7.7%	131.0%
Operation Consultant 4	Store 179	15.0%	5.9%	5.6%	11.8%	36.8%	7.7%	5.4%	31.2%	11.4%	130.8%
Operation Consultant 1	Store 126	0.0%	8.3%	0.0%	7.1%	46.2%	20.0%	23.1%	5.0%	15.8%	125.5%
Operation Consultant 22	Store 151	13.3%	11.1%	13.3%	6.2%	15.8%	23.8%	12.0%	23.8%	5.9%	125.2%
Operation Consultant 11	Store 61	0.0%	7.7%	0.0%	0.0%	21.4%	50.0%	7.1%	18.2%	20.0%	124.4%
Operation Consultant 20	Store 120	20.0%	0.0%	0.0%	8.3%	8.3%	30.0%	7.1%	18.8%	30.0%	122.5%

A full matrix of every store against every period from the selected year to the latest upload. It always shows the full year range, not just the From/To filter.

What to look at: stores with a high rate in many months in a row - they have a lasting problem, not a one-off.

90-Day Turnover

Where to find it: Side menu > 90-Day Turnover

Use this page to see how many new hires leave within their first 90 days. It tracks "early leavers": employees hired in a given month (a cohort) who resigned within their first 90 days. The 90-Day Rate = early leavers / total new hires in that cohort x 100. A cohort is marked "Provisional" until 90 days after the end of its hiring month (for several months: the latest one), because its final rate can still change.

Step 1 - Choose the cohort and your scope

90-Day Turnover

Of everyone hired in a month, the share who resigned within their first 90 days

2026

All Months

All Stores

All Operation Managers

All Operation Consultants

Senior Operation Consultants

Operation Directors

Job Title

Reset Filters

The month selector picks which hiring cohort(s) to look at. Everything on the page, except the trend chart and the Full Data Table (both always show every cohort), is scoped to the cohort(s) you select. Choosing a Store, Operation Manager, Operation Consultant, Senior Operation Consultant, Operation Director or Job Title filters every chart and table to just that selection.

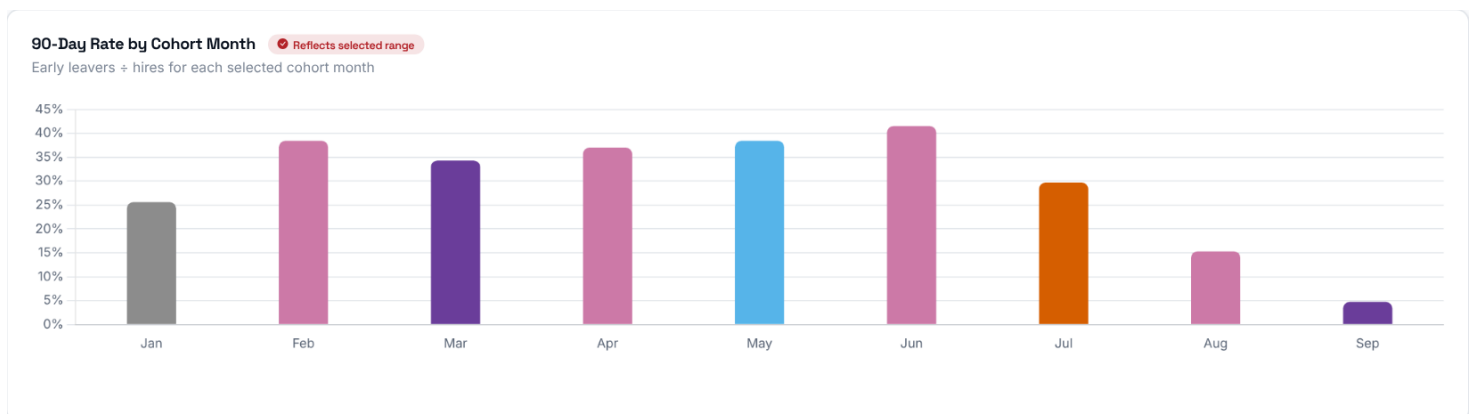

Step 2 - Read the headline numbers

What to look at: the 90-Day Turnover Rate: early leavers divided by hires in the cohort.

Then decide: a high rate means many new people do not stay past their first three months - look at hiring quality, onboarding and training before looking at anything else.

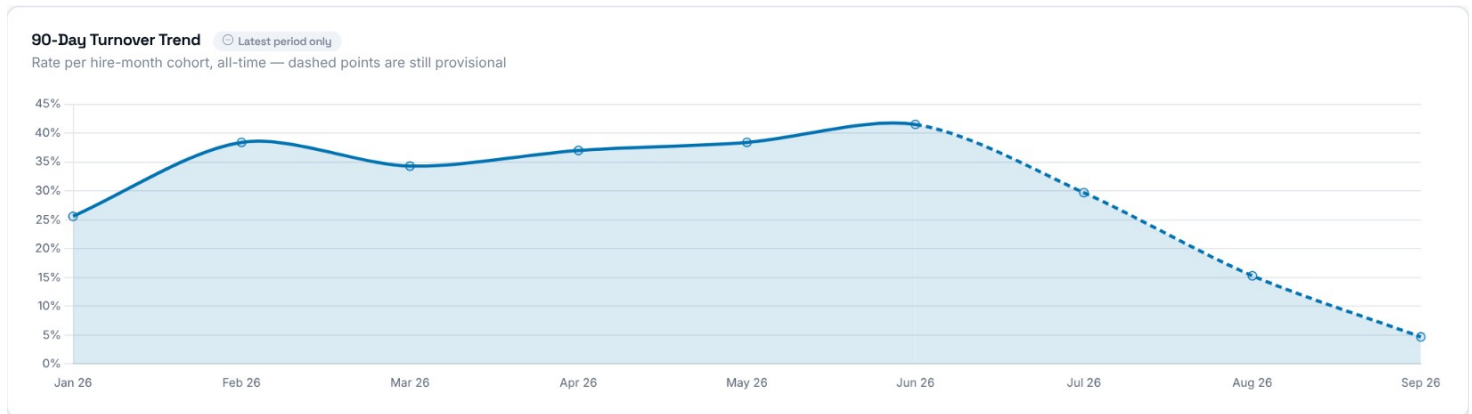

Step 3 - Which hiring months stick better?

The 90-Day Rate for each monthly hiring cohort (people hired that month), so you can compare how "sticky" different hiring months have been.

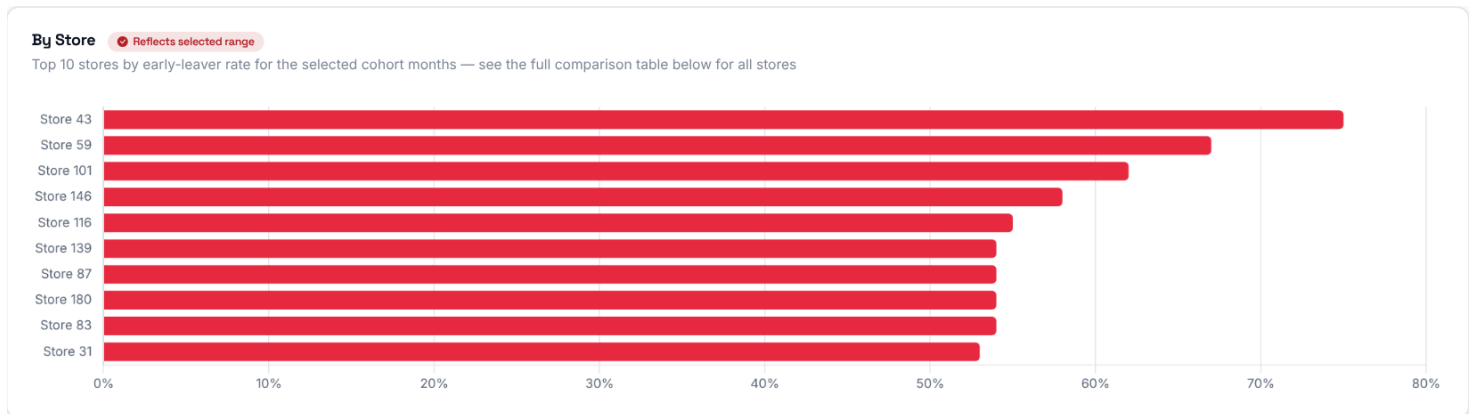

Step 4 - Is the trend improving?

The 90-Day Rate for every monthly hiring cohort since the first hires in the data. It ignores the Year and Months selection, but still follows the Store, manager and Job Title filters. Dashed segments are cohorts that are still provisional.

Step 5 - Which stores lose their new hires?

The 90-Day Rate for each store in the selected cohort(s). The chart shows the top 10 stores by early-leaver rate; the full comparison is in the table below.

Store Name ↕	OC ↕	OM ↕	Hires ↕	Early Leavers ↕	90-Day Rate ↕
Store 43	Operation Consultant 13	Operation Manager 1	12	9	75.0%
Store 59	Operation Consultant 6	—	6	4	66.7%
Store 101	Operation Consultant 14	Operation Manager 2	16	10	62.5%
Store 146	Operation Consultant 12	Operation Manager 1	12	7	58.3%
Store 116	Operation Consultant 26	—	20	11	55.0%
Store 87	Operation Consultant 14	Operation Manager 2	11	6	54.5%
Store 83	Operation Consultant 26	—	24	13	54.2%
Store 180	Operation Consultant 2	—	13	7	53.8%
Store 139	Operation Consultant 4	—	28	15	53.6%
Store 131	Operation Consultant 7	—	15	8	53.3%

Every store with its total hires, early leavers and 90-Day Rate for the selected cohort(s). Click a column header to sort.

Then decide: talk to the Operation Consultant of the stores at the top and review how new hires are welcomed and trained there.

Step 6 - Why do new hires leave?

Reasons for Early Leaving

Reflects selected range

From exit interviews, matched to this cohort's early leavers

The reasons given in exit interviews by employees who resigned within their first 90 days (early leavers with no exit interview are not counted).

Step 7 - Who leaves early?

Gender Breakdown

Reflects selected range

Gender of early leavers for the selected cohort months

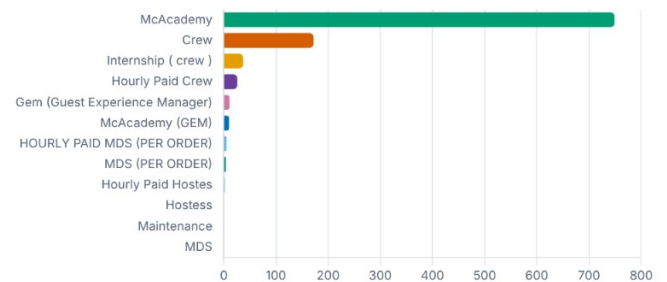

Female
Male

284 (28%)
735 (72%)

By Job Title

Reflects selected range

Job titles of early leavers for the selected cohort months

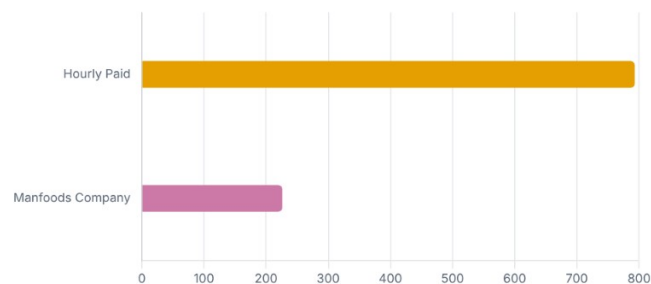

Gender split of the early leavers in the selected cohort(s).

• Operation Consultant 7	6	114	36	31.6%
• Operation Consultant 4	8	223	70	31.4%
• Operation Consultant 9	5	87	27	31.0%
• Operation Consultant 24	8	95	29	30.5%
• Operation Consultant 8	7	145	43	29.7%

Operation Directors
Reflects selected range

Ranked by average 90-day rate

Name	Stores	Hires	Early Leavers	90-Day Rate
▼ Operation Director 1	101	1889	569	30.1%
▼ Operation Director 2	91	1492	447	30.0%

Operation Managers
Reflects selected range

Ranked by average 90-day rate

Name	Stores	Hires	Early Leavers	90-Day Rate
▼ Operation Manager 1	42	615	178	28.9%
▼ Operation Manager 2	50	775	213	27.5%

Senior Operation Consultants
Reflects selected range

Ranked by average 90-day rate

Name	Stores	Hires	Early Leavers	90-Day Rate
▼ Senior Operation Consultant 1	21	490	157	32.0%
▼ Senior Operation Consultant 3	24	453	142	31.3%
• Senior Operation Consultant 2	25	424	127	30.0%

Operation Consultants, Senior Operation Consultants, Operation Directors and Operation Managers ranked, highest 90-Day Rate first, by their stores' combined rate (early leavers / hires across all their stores) for the selected cohort(s).

Step 9 - Spot the pattern store by store

OC ↕	Store ↕	Jan 26 ↕	Feb 26 ↕	Mar 26 ↕	Apr 26 ↕	May 26 ↕	Jun 26 ↕	Jul 26 ↕	Aug 26 ↕	Sep 26 ↕	TOTAL ↕
Operation Consultant 12	Store 35	100.0%	50.0%	50.0%	0.0%	100.0%	0.0%	100.0%	100.0%	—	500.0%
Operation Consultant 18	Store 162	50.0%	100.0%	0.0%	25.0%	50.0%	50.0%	50.0%	50.0%	100.0%	475.0%
Operation Consultant 7	Store 131	100.0%	—	25.0%	50.0%	66.7%	100.0%	0.0%	100.0%	—	441.7%
Operation Consultant 17	Store 13	0.0%	100.0%	37.5%	100.0%	80.0%	50.0%	20.0%	40.0%	0.0%	427.5%
Operation Consultant 20	Store 68	25.0%	100.0%	0.0%	100.0%	0.0%	66.7%	100.0%	33.3%	0.0%	425.0%
Operation Consultant 26	Store 116	—	100.0%	66.7%	50.0%	100.0%	50.0%	25.0%	33.3%	0.0%	425.0%
Operation Consultant 8	Store 130	25.0%	100.0%	100.0%	40.0%	50.0%	75.0%	33.3%	—	0.0%	423.3%
Operation Consultant 13	Store 43	100.0%	—	—	100.0%	—	100.0%	75.0%	33.3%	—	408.3%
Operation Consultant 14	Store 104	0.0%	66.7%	100.0%	33.3%	100.0%	75.0%	28.6%	0.0%	0.0%	403.6%
Operation Consultant 20	Store 114	33.3%	50.0%	100.0%	0.0%	50.0%	66.7%	66.7%	33.3%	0.0%	400.0%
Operation Consultant 16	Store 31	0.0%	100.0%	—	33.3%	50.0%	66.7%	75.0%	50.0%	0.0%	375.0%

Every store's 90-Day Rate for each hiring month (all cohorts), one row per store and one column per month, plus a Total column that adds up the monthly rates. Use it to spot stores whose rates are consistently high, or improving or worsening over time. Search by store or Operation Consultant; click any column header to sort.

Step 10 - Who exactly left?

Name ↕	Store ↕	Job Title ↕	Hire Date ↕	Resignation Date ↕	Tenure (days) ^{1F}
Employee 1	Store 184	McAcademy	2026-02-09	2026-02-10	1
Employee 2	Store 152	Crew	2026-02-19	2026-02-20	1
Employee 3	Store 42	Crew	2026-03-31	2026-04-01	1
Employee 4	Store 133	Hourly Paid Crew	2026-04-07	2026-04-08	1
Employee 5	Store 181	McAcademy	2026-04-16	2026-04-17	1
Employee 6	Store 101	Crew	2026-04-23	2026-04-24	1
Employee 7	Store 66	McAcademy	2026-03-04	2026-03-05	1
Employee 8	Store 183	Crew	2026-06-17	2026-06-18	1
Employee 9	Store 44	McAcademy	2026-06-26	2026-06-27	1
Employee 10	Store 122	McAcademy	2026-07-21	2026-07-22	1
Employee 11	Store 78	McAcademy	2026-07-06	2026-07-07	1
Employee 12	Store 43	Crew	2026-07-07	2026-07-08	1

The individual employees who resigned within their first 90 days in the selected cohort(s): name, store, job title, hire and resignation dates, and how many days they lasted. Click a column header to sort.

What to look at: very short tenures (a few days) - these usually point to a problem in hiring or the first-day experience rather than in the job itself.

Comparisons

Where to find it: Side menu > Comparisons

Use this page to see whether things got better or worse. It compares two periods side by side, Period A and Period B, each with its own independent filters. Every card, chart and table shows both periods together; the headline cards, Smart Insights and the store table also show the change between them (A minus B).

Step 1 - Choose the two periods

A Period A

YEAR
2026

SELECT MONTHS
All Months

STORE NAME
All Stores

OPERATION MANAGER
All Operation Managers

OPERATION CONSULTANT
All Operation Consultants

SENIOR OPERATION CONSULTANTS
Senior Operation Consultant

OPERATION DIRECTORS
Operation Directors

B Period B

YEAR
2026

SELECT MONTHS
All Months

STORE NAME
All Stores

OPERATION MANAGER
All Operation Managers

OPERATION CONSULTANT
All Operation Consultants

SENIOR OPERATION CONSULTANTS
Senior Operation Consultant

OPERATION DIRECTORS
Operation Directors

Same months as A, last year

Period A and Period B each have their own year, months, store, Operation Manager, Operation Consultant, Senior Operation Consultant and Operation Director filters - they do not have to match. The "Same months as A, last year" button fills Period B with the same filters as Period A but one year earlier, which is the quickest way to compare year over year.

Step 2 - Read the Smart Insights

Turnover Rate: No Change
A (Jan/Feb/Mar/Apr/May/June/July/Aug/Sep 2026): 52.0% vs B (Jan/Feb/Mar/Apr/May/June/July/Aug/Sep 2026): 52.0% — essentially unchanged.

90-Day Rate: No Change
A (Jan/Feb/Mar/Apr/May/June/July/Aug/Sep 2026): 31.8% vs B (Jan/Feb/Mar/Apr/May/June/July/Aug/Sep 2026): 31.8% — essentially unchanged.

Up to three automatic cards: whether the Turnover Rate and the 90-Day Rate improved or worsened from Period B to Period A, and (only when both periods use All Stores) the store whose Turnover Rate moved the most.

Step 3 - Compare the headline numbers

HEADCOUNT Employees on the active roster A 41998 B 41998 - 0.0 (A-B)	NEW HIRES Employees hired in the period A 1737 B 1737 - 0.0 (A-B)	RESIGNATIONS Total resignations in the period A 2429 B 2429 - 0.0 (A-B)	TURNOVER % Resignations + average headcount A 52.0% B 52.0% - 0.0 (A-B)	90-DAY EARLY LEAVERS Resigned within 90 days of hire A 1015 B 1015 - 0.0 (A-B)	90-DAY TURNOVER RATE Early leavers + hires in the cohort A 31.8% B 31.8% - 0.0 (A-B)
---	--	--	--	---	---

Headcount, New Hires, Resignations, Turnover Rate, Early Leavers and 90-Day Rate for Period A and Period B side by side, each with the change A minus B. Green means A is better than B (more hires, fewer resignations or leavers, lower rates); Headcount is not coloured. With several months selected, Headcount adds up each month's roster.

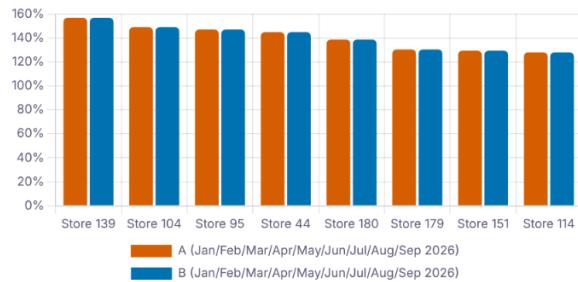

What to look at: the Turnover Rate and 90-Day Rate changes first - they tell you immediately whether retention improved.

Step 4 - Which stores got better or worse?

Turnover Rate by Store — A vs B

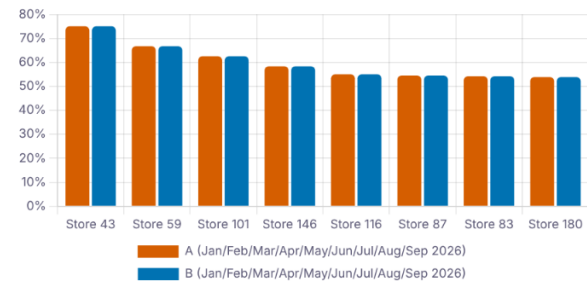

Top 8 stores by combined A+B turnover — or a single A vs B bar if a store is selected in either panel

1 Basis: resignations divided by average active headcount across the selected months. When no store is selected, the chart shows the top 8 stores by combined A+B rate.

90-Day Rate by Store — A vs B

Top 8 stores by combined A+B 90-day rate — or a single A vs B bar if a store is selected in either panel

1 Basis: employees hired in the selected cohorts who resigned within 90 days, divided by total hires in those cohorts. The chart uses the same months and filters as the comparison.

Turnover Rate per store for Period A vs Period B, as paired bars. When neither period has a store selected, the chart shows the top 8 stores by combined A+B rate; if either period has a store selected, it shows a single Overall pair.

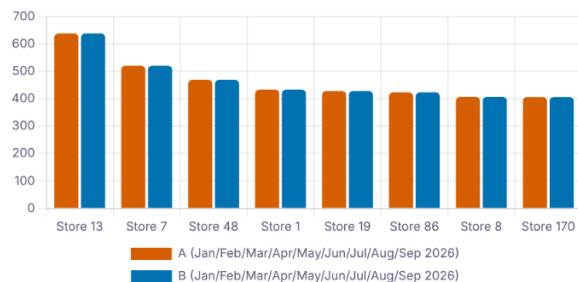

90-Day Rate per store for Period A vs Period B, as paired bars (top 8 stores by combined A+B rate when neither period has a store selected, otherwise a single Overall pair), using the same months and filters as the comparison.

Then decide: stores where the Period B bar is much higher than Period A need a conversation with their Operation Consultant.

Step 5 - Headcount and resignations

Workforce by Store — A vs B

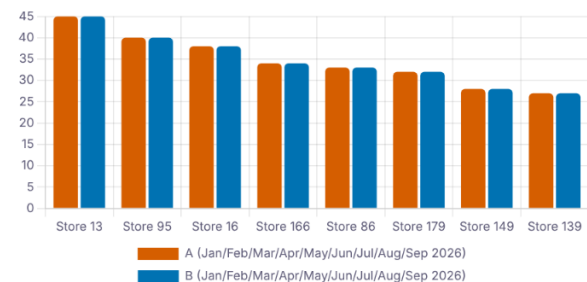

Active headcount by store, or total headcount when a store is selected

1 Basis: active employee roster snapshots. Headcount is summed across the selected months; the chart shows the top 8 stores by combined A+B headcount.

Resignations Count by Store — A vs B

Resignation count by store, or total resignations when a store is selected

1 Basis: resignation records assigned to the selected months and filters. The chart shows counts, not a percentage; the top 8 stores are ranked by combined A+B count.

Active headcount per store for Period A vs Period B, as paired bars (top 8 stores by combined A+B; the months of a period are added together), or one overall pair when either period has a store selected.

Resignation count per store for Period A vs Period B (top 8 stores by combined A+B), or one overall pair when either period has a store selected. It shows counts, not a percentage.

Step 6 - Are people staying longer?

Retention Milestones — A vs B

Retention at 6 months, 1 year and later milestones for eligible hire cohorts

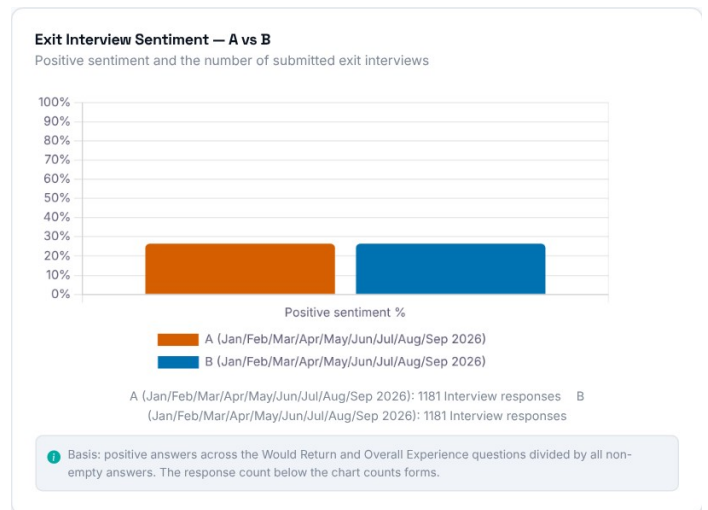

Retention rate at the 6-month, 1-year and 2-5-year milestones for Period A vs Period B, based on employees hired in the selected months who are old enough (or already resigned) at each milestone; a milestone with no eligible hires has no bar.

Step 7 - Why are people leaving?

The 8 most common reasons recorded in exit interviews (by combined A+B count), Period A vs Period B, so you can see whether the same reasons dominate or the mix shifted.

Positive exit-interview sentiment (the positive share of the Would Return and Overall Experience answers) and how many interviews were submitted, Period A vs Period B.

Step 8 - Store by store

Store Name [⬆]	Turnover% A [⬆]	Turnover% B [⬆]	Change (A-B) [⬆]	90-Day% A [⬆]	90-Day% B [⬆]	Change (A-B) [⬆]
Store 1	41.6%	41.6%	0.0	31.8%	31.8%	0.0
Store 2	15.3%	15.3%	0.0	0.0%	0.0%	0.0
Store 3	58.2%	58.2%	0.0	18.2%	18.2%	0.0
Store 4	44.3%	44.3%	0.0	38.1%	38.1%	0.0
Store 5	111.0%	111.0%	0.0	46.4%	46.4%	0.0
Store 6	36.6%	36.6%	0.0	27.3%	27.3%	0.0
Store 7	45.0%	45.0%	0.0	33.3%	33.3%	0.0
Store 8	22.1%	22.1%	0.0	27.3%	27.3%	0.0
Store 9	42.3%	42.3%	0.0	29.6%	29.6%	0.0
Store 10	20.7%	20.7%	0.0	—	—	—

Every store with its Turnover Rate and 90-Day Rate in both periods, plus the change (A minus B) for each. It is shown only when both periods use "All Stores". Click a column header to sort.

Retention

Where to find it: Side menu > Retention

Use this page to see how long employees stay - the opposite lens from Turnover. Most charts are snapshots of today's active team: how long people have been on the job, using 6 months (180 days) as the main benchmark. Two parts look at the past instead: the Smart Insights (hire-cohort retention) and the all-time "how soon people leave" chart.

Step 1 - Choose the hires and your scope

Retention

How long new hires actually stay — milestones, survival curve, and long-term trends

2026

All Months

All Stores

All Operation Managers

All Operation Consultants

Senior Operation Consultants

Operation Directors

Job Title

Reset Filters

Choosing a Store, Operation Manager, Operation Consultant, Senior Operation Consultant, Operation Director or Job Title filters every chart and table to just that selection. The Year/Months filter only affects the Smart Insights (which hires they look at); every chart shows the current team from the latest roster, except the monthly hiring chart, which starts at the selected year.

Step 2 - Read the Smart Insights

1-Year Retention Slipping

63.6% avg over the last 3 cohort(s) vs 77.7% before — -14.1pt.

Best 1-Year Retention: Store 130

0% of hires are still there after 1 year.

Weakest 1-Year Retention: Store 56

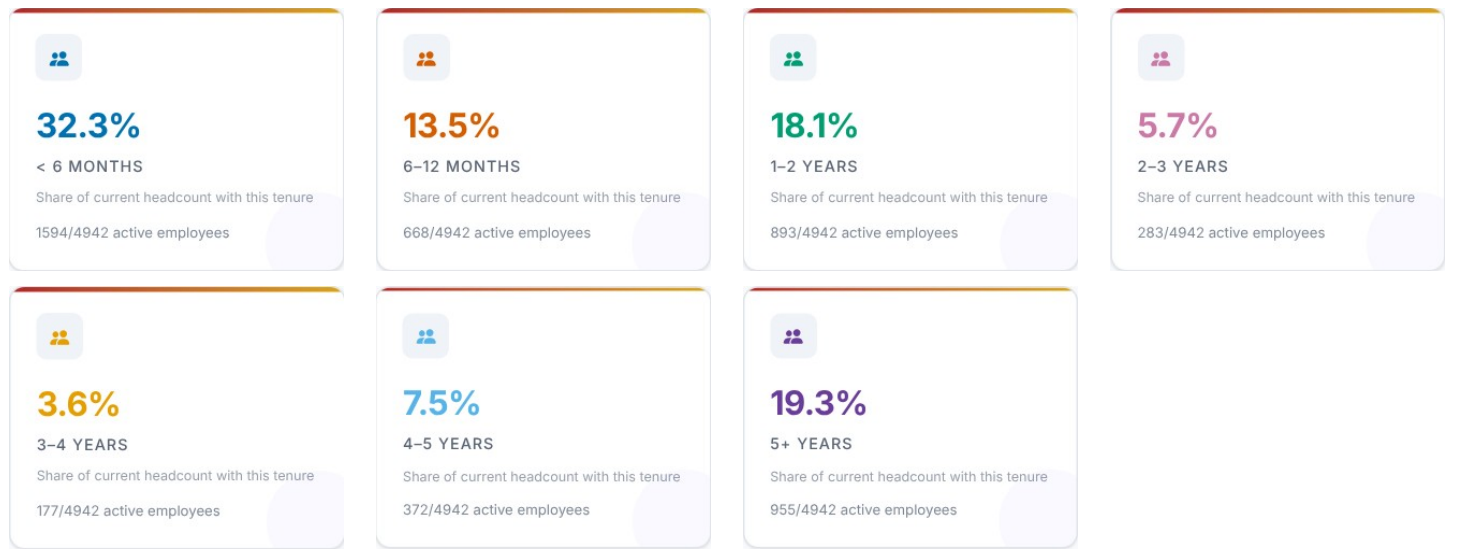

Only 0% of hires are still there after 1 year.

Workforce Maturity

54% of the current active workforce has been here a year or more.

Up to four automatic takeaways: whether 1-year retention of recent hiring months is improving or slipping, the best store (and the weakest, if under 50%) for 1-year retention among employees hired in the selected months, and the share of today's team with more than a year of service. Read these first, then use the charts below.

Step 3 - How experienced is today's team?

Each card shows the share of today's active headcount currently in a tenure band (under 6 months, 6-12 months, 1-2 years ... 5+ years); the bands add up to 100%. It is a snapshot of team experience, not a survival rate, and it ignores the Months filter.

What to look at: how large the "< 6 months" card is compared with the longer-tenure cards.

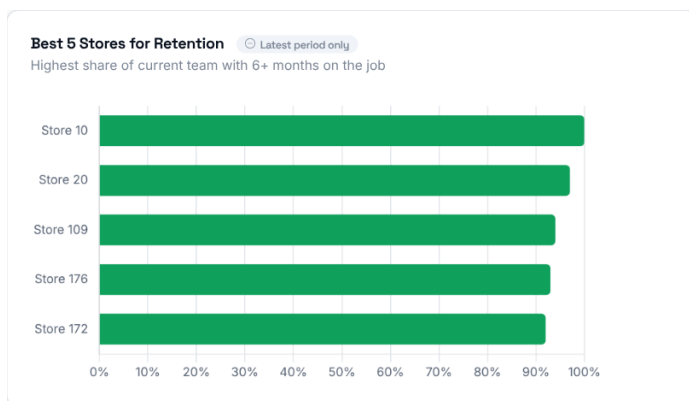

Then decide: a large new-joiner share means more coaching and closer follow-up in the coming months.

Step 4 - Where do people drop off?

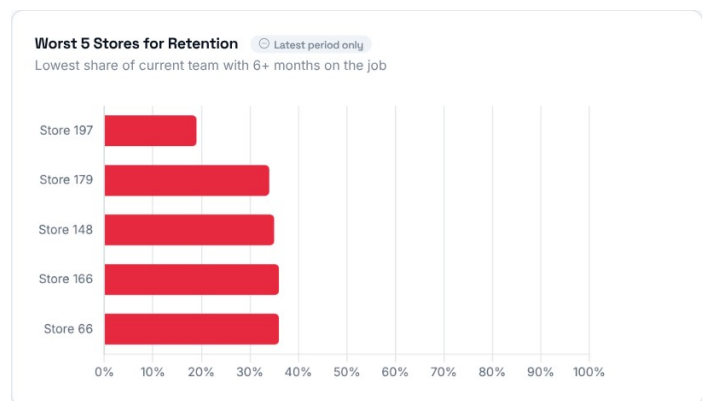

The Team Tenure Curve shows, for each tenure mark (Day 0, 1, 3, 6 months, 1, 1.5, 2, 3, 4 and 5 years), the percentage of today's active employees who have been on the job at least that long. It describes the current team, not hires over time, and it ignores the Months filter.

Step 5 - Which stores keep their people?

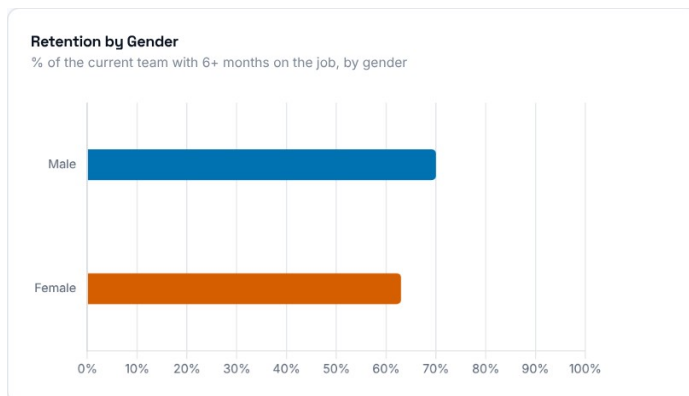

The 5 stores with the highest share of their current team that has 6+ months on the job.

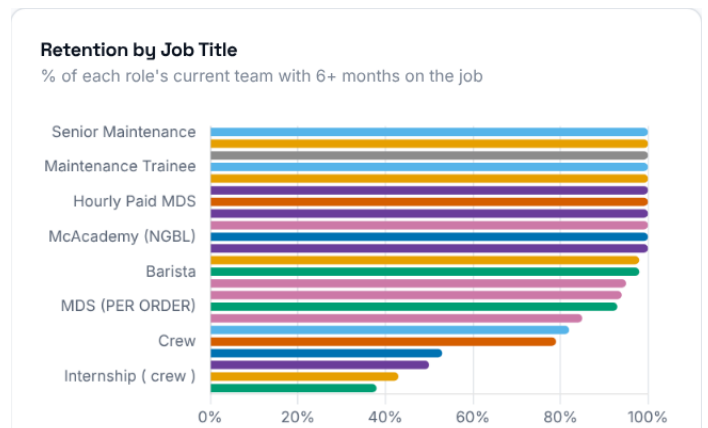

The 5 stores with the lowest share of their current team that has 6+ months on the job - worth a closer look.

Step 6 - Who stays?

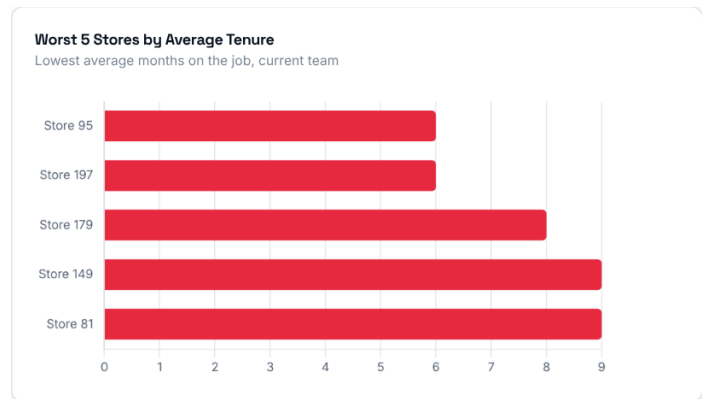

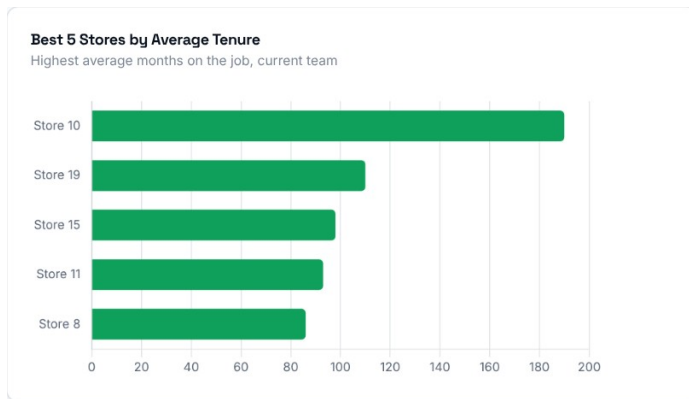

Share of the current team with 6+ months on the job, split by gender.

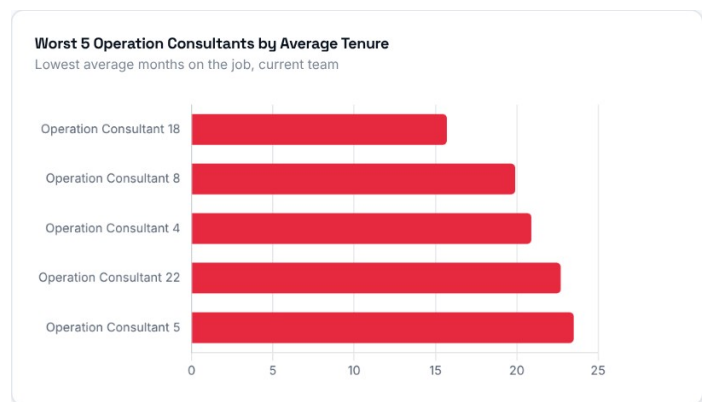

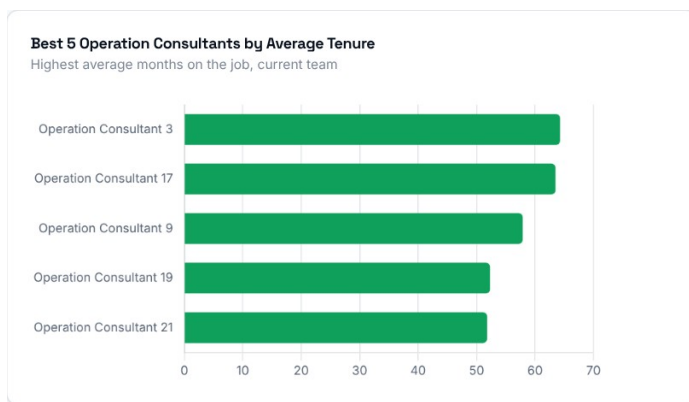

Share of each job title's current team that has been on the job 6+ months.

Step 7 - Average tenure

The 5 stores with the highest and the 5 with the lowest average tenure of their current team, in months.

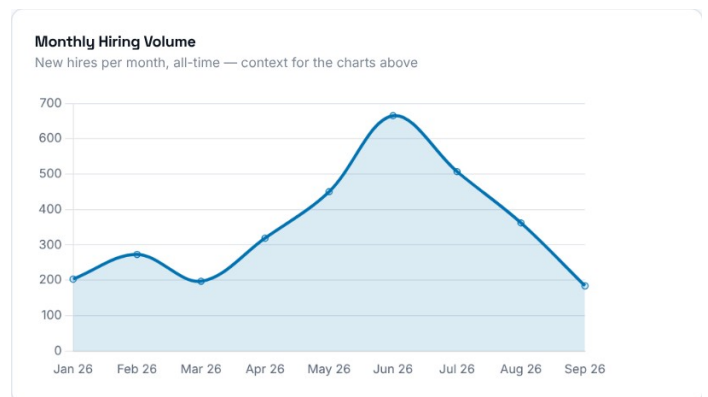

The 5 Operation Consultants with the highest and the 5 with the lowest average tenure across their stores' current teams.

Step 8 - When do people leave, and how much are we hiring?

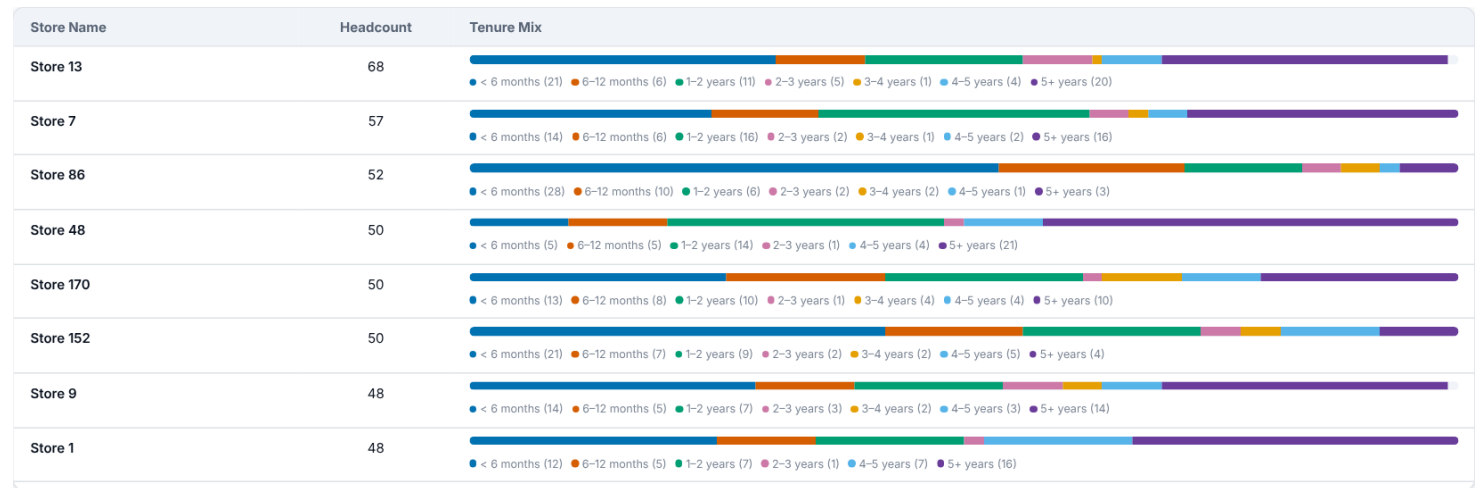

Of everyone who ever resigned (all-time, not limited to the selected period), how long they had been on the job before leaving. It shows whether people tend to leave early or after settling in.

New hires per month from the selected year onward (everyone hired that month, including people who have since left; it ignores the Months filter) - context for reading the retention charts alongside how much hiring was actually happening.

Step 9 - Store by store

Every store's headcount on the latest roster and a tenure-band mix (how many employees fall in each tenure range), so you can see whether a store's team is mostly new or mostly experienced.

Step 10 - Who should you talk to?

Operation Consultants
 Ranked by average tenure of current team

Name	Stores	Headcount	Avg. Tenure
Operation Consultant 3	10	264	64.3 mo
Operation Consultant 17	12	372	63.5 mo
Operation Consultant 9	5	140	57.9 mo
Operation Consultant 19	10	215	52.3 mo
Operation Consultant 21	8	256	51.8 mo
Operation Consultant 24	8	216	49.5 mo
Operation Consultant 13	5	91	42.7 mo
Operation Consultant 12	8	220	41.1 mo
Operation Consultant 25	8	231	40.4 mo
Operation Consultant 16	7	187	39.5 mo
Operation Consultant 23	8	215	38.3 mo
Operation Consultant 6	7	199	38.1 mo
Operation Consultant 7	6	122	36.7 mo
Operation Consultant 2	6	146	36.5 mo

Operation Directors
 Ranked by average tenure of current team

Name	Stores	Headcount	Avg. Tenure
Operation Director 1	102	2614	39.2 mo
Operation Director 2	91	2309	37.7 mo

Operation Managers
 Ranked by average tenure of current team

Name	Stores	Headcount	Avg. Tenure
Operation Manager 2	51	1264	51.4 mo
Operation Manager 1	42	988	34.6 mo

Senior Operation Consultants
 Ranked by average tenure of current team

Name	Stores	Headcount	Avg. Tenure
Senior Operation Consultant 2	25	706	40.5 mo
Senior Operation Consultant 3	24	615	39.5 mo
Senior Operation Consultant 1	21	505	20.7 mo

Operation Consultants, Senior Operation Consultants, Operation Directors and Operation Managers ranked, longest average tenure first, by the average tenure (in months) of the current team across all their stores.

Exit Interviews

Where to find it: Side menu > Exit Interviews

Use this page to understand why people leave, in aggregate. It summarises what departing employees said in their exit interviews: reasons for leaving, whether they would return, ratings on training, fairness and workload, and free-text comments, for the selected period (based on the employee's resignation date, or the form's completion date when no resignation is matched). Individual responses are never identified.

Step 1 - Choose the period and your scope

Exit Interviews

Why people are leaving, in aggregate — individual responses are never identified

2026

All Months

All Stores

All Store Leaders

All Operation Consultants

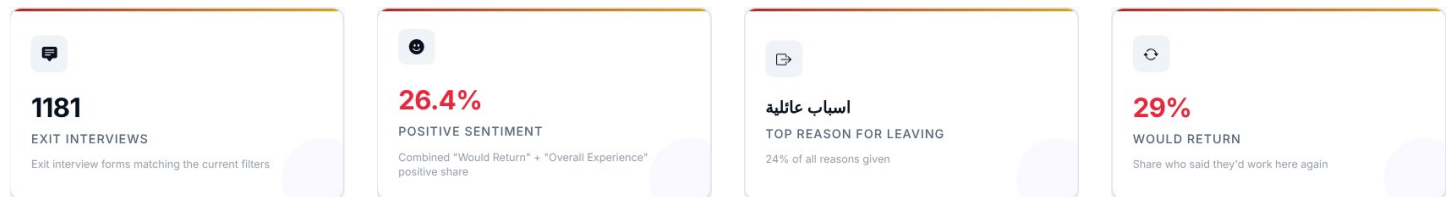

All Operation Managers

Job Title

Reset Filters

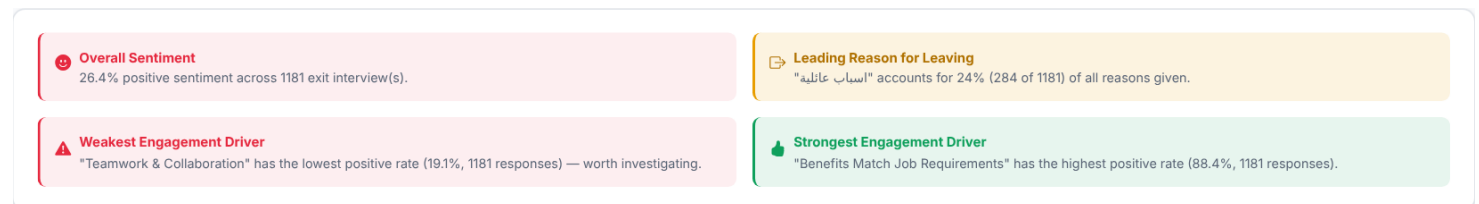

Choosing a Store, Store Leader, Operation Consultant, Operation Manager or Job Title filters every chart, table and comment on this page to just that selection. The Year/Months filter scopes everything to that period, except the reasons-trend chart, which always shows the full history.

Step 2 - Read the headline numbers

What to look at: Positive Sentiment and Would Return - together they tell you how people feel when they leave.

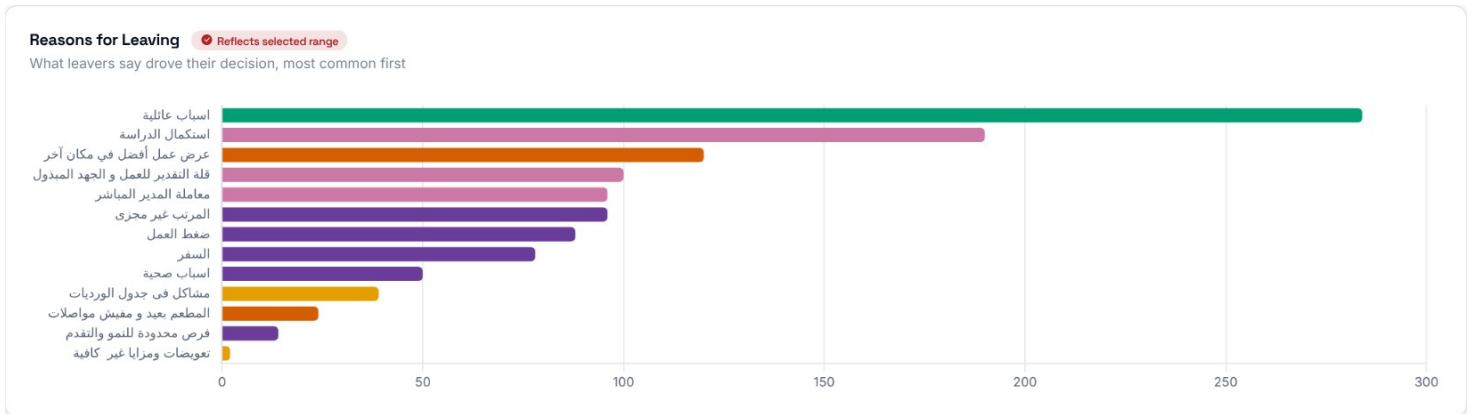

Step 3 - Read the Smart Insights

Up to four automatic takeaways worked out from the exit interviews for your current filters: overall positive sentiment, the leading reason for leaving, and the weakest and strongest engagement drivers. Positive Sentiment is the positive share of the Would Return and Overall Experience answers.

Step 4 - Why do people leave?

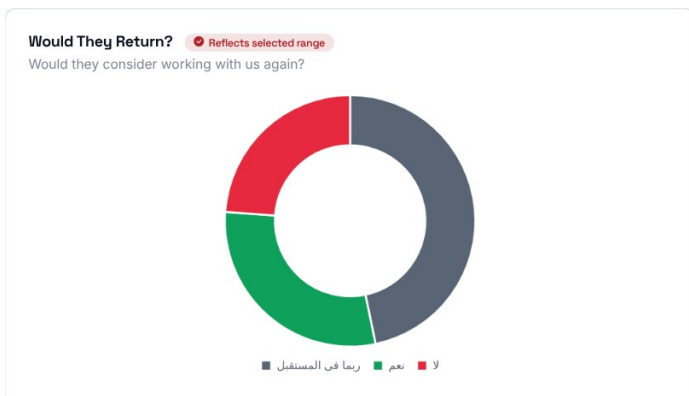

The reasons employees gave for resigning, ranked by how often each was cited.

Then decide: the top reasons are where your retention effort should go first.

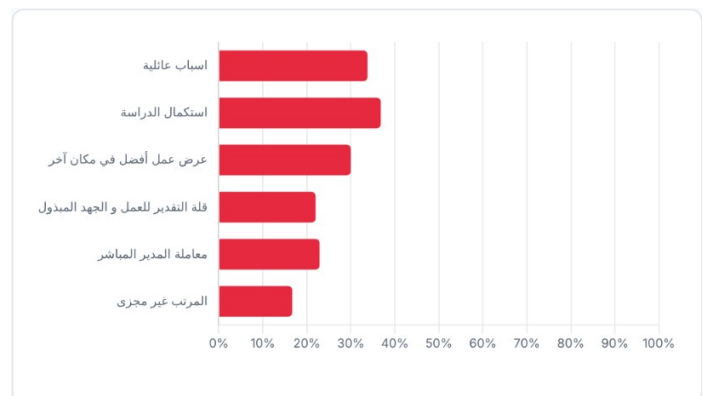

How the 5 most common resignation reasons (all-time) have trended month over month. It ignores the Year/Months and Job Title filters but follows Store, Store Leader, Operation Consultant and Operation Manager.

Step 5 - Would they come back?

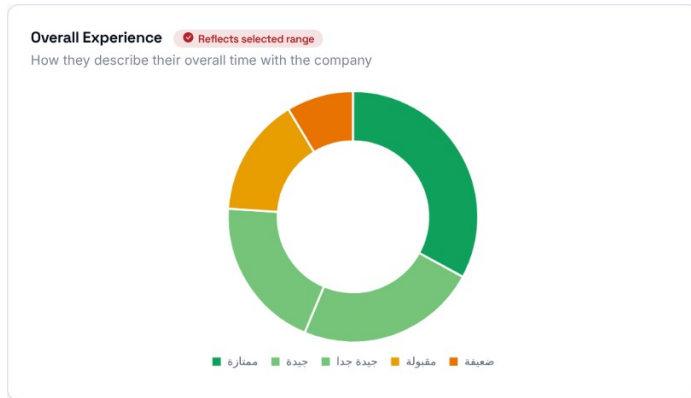

Whether departing employees said they would consider returning to work here in the future.

For the 6 most common reasons (each with at least 2 interviews), the share of people who answered Yes to returning. It shows which reasons tend to be "final" and which are more circumstantial.

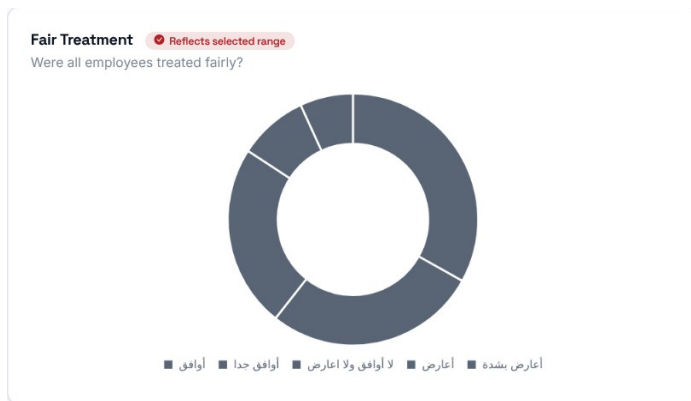

Step 6 - How did they rate their experience?

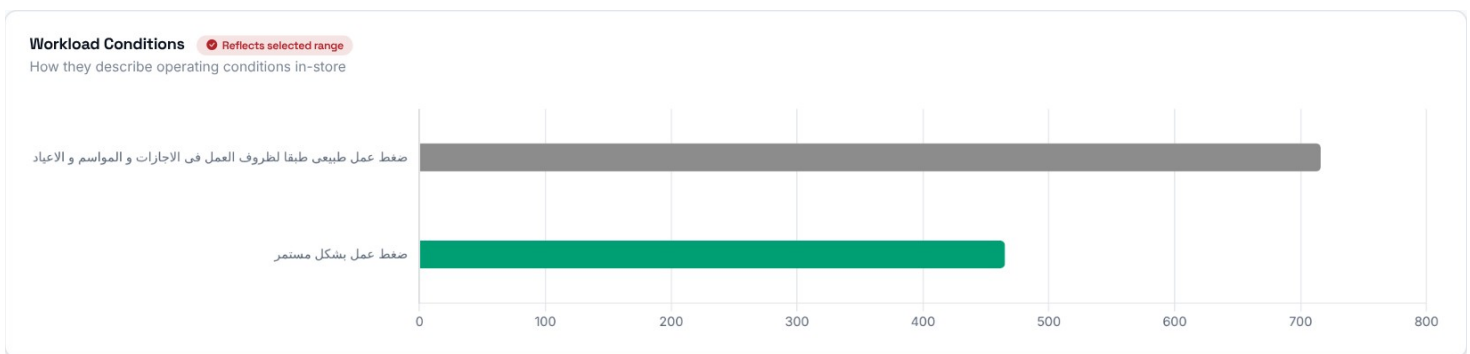

How departing employees rated their overall experience working here.

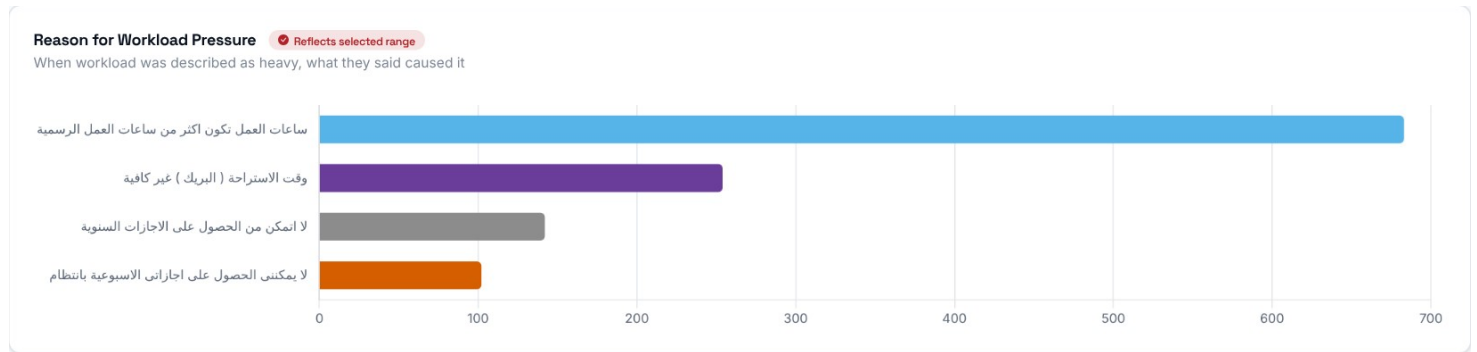

How departing employees rated the training they received.

How departing employees rated whether they were treated fairly.

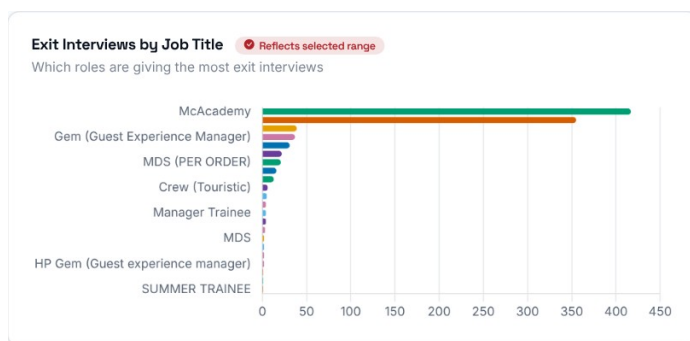

How departing employees rated their workload and working conditions.

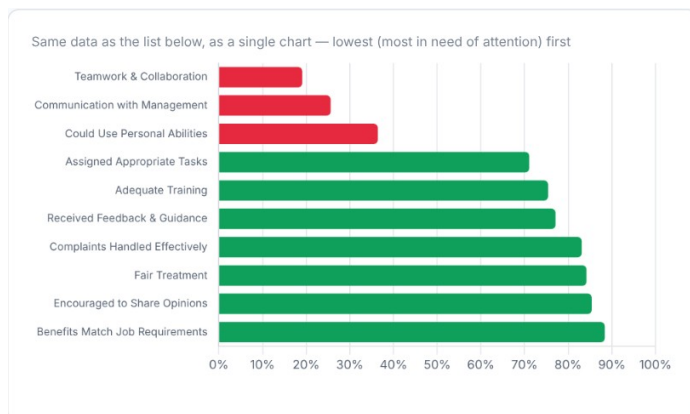

A breakdown of the specific work-pressure reasons written in the exit interviews (interviews with no work-pressure answer are not counted).

Step 7 - Who is leaving?

Exit interview responses grouped by the departing employee's job title.

Step 8 - Engagement drivers

The share of people who answered positively on each engagement driver, lowest first, shown as a chart and as the same list. Bars are green at 70%+ positive, amber at 40-69% and red below 40%. The drivers at the top need the most attention.

Then decide: pick the lowest one or two drivers and agree with the Operation Consultant what will change in the stores concerned.

Step 9 - Read what people wrote

Store Name ▾	Store Leader ▾	Question ▾	Comment
Store 28	Store Leader 1	Other Reason	Example comment text.
Store 28	Store Leader 1	Workload Pressure Reason	Example comment text.
Store 28	Store Leader 1	What They'd Change	Example comment text.
Store 28	Store Leader 1	What They Learned	Example comment text.
Store 28	Store Leader 1	Final Comments	Example comment text.
Store 28	Store Leader 1	Other Reason	Example comment text.
Store 28	Store Leader 1	Workload Pressure Reason	Example comment text.
Store 28	Store Leader 1	What They'd Change	Example comment text.
Store 28	Store Leader 1	What They Learned	Example comment text.
Store 28	Store Leader 1	Final Comments	Example comment text.

The free-text comments departing employees left (reasons given as "other", work-pressure reason, what they would change, what they learned, final comments), with store and store leader, searchable by text, store or question and filterable by question.

Store Name ▾	Store Leader ▾	Comment
Store 28	Store Leader 1	Example comment text.
Store 28	Store Leader 1	Example comment text.
Store 68	Store Leader 2	Example comment text.
Store 179	Store Leader 3	Example comment text.
Store 179	Store Leader 3	Example comment text.
Store 151	Store Leader 4	Example comment text.
Store 151	Store Leader 4	Example comment text.
Store 104	Store Leader 5	Example comment text.
Store 104	Store Leader 5	Example comment text.
Store 104	Store Leader 5	Example comment text.

What departing employees said they would change about the job or store, newest first (click Store or Store Leader to re-sort); the same answers also appear in the Comments table above, under the question "What They'd Change".

Early Warning

Where to find it: Side menu > Early Warning

Use this page to spot people who may be about to leave, before they actually do. It flags currently active employees who statistically resemble people who resigned in the past. Each flagged employee gets a 1-5 star risk score built from several weighted signals; employees with no matching signal are not listed. Higher stars mean higher predicted risk. Everyone flagged counts as "watch-listed" (cards and charts); those at 4-5 stars appear in the High-Risk table and the rest (1-3 stars) in the Watch List table.

Step 1 - Choose your scope

Early Warning
At-risk employees identified before they resign

2026

All Months

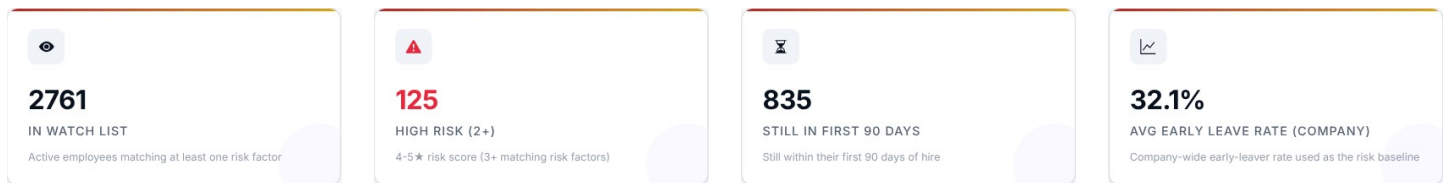

All Stores

Job Title

Reset Filters

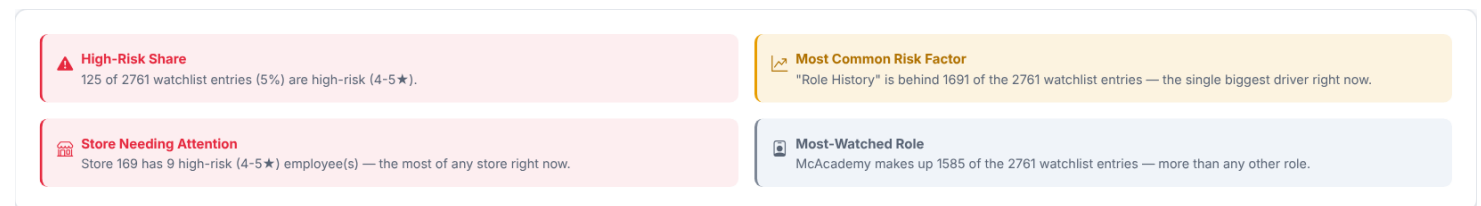

Choosing a Store or Job Title filters every card, chart and table to that selection. The Year/Months filter picks which monthly roster the risk scores are calculated on (the latest selected month). Because risk is about currently active employees, it is normally left on the latest period; the trend chart ignores it.

Step 2 - Read the headline numbers

What to look at: High Risk (the people at 4-5 stars) first, then how many are still inside their role's new-hire window (90 days by default, 30-180 days by role). The fourth card shows the company-wide early-leave rate used as the baseline.

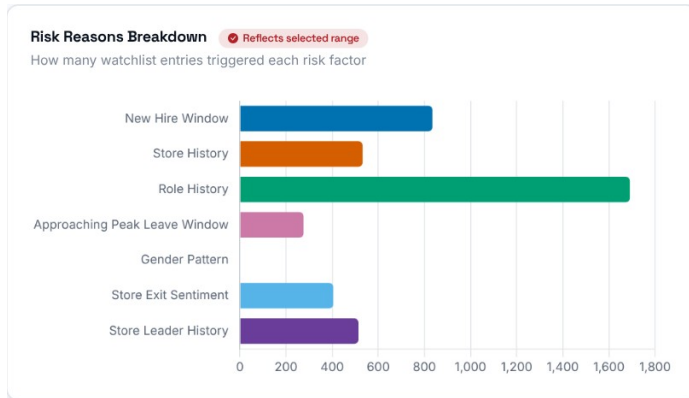

Step 3 - Read the Smart Insights

Automatic takeaways worked out from the watch list for your current filters.

Step 4 - What is driving the risk?

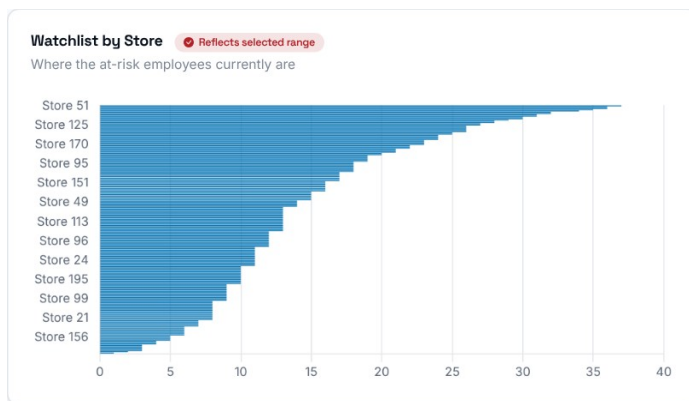

Which risk signal (reason) is driving flags most often across the watch list right now.

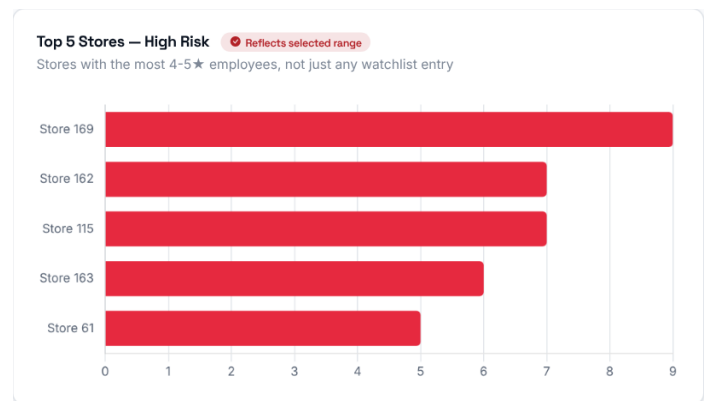

How many watch-listed employees fall into each star rating (1 through 5), so you can see the overall risk distribution.

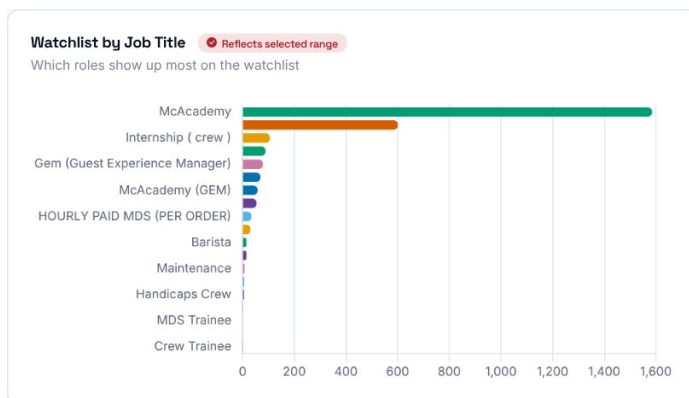

Step 5 - Where is the risk?

Watch-listed employees grouped by store, so you can see which stores carry the most flight-risk headcount right now.

The 5 stores with the most highest-risk (4-5 star) employees.

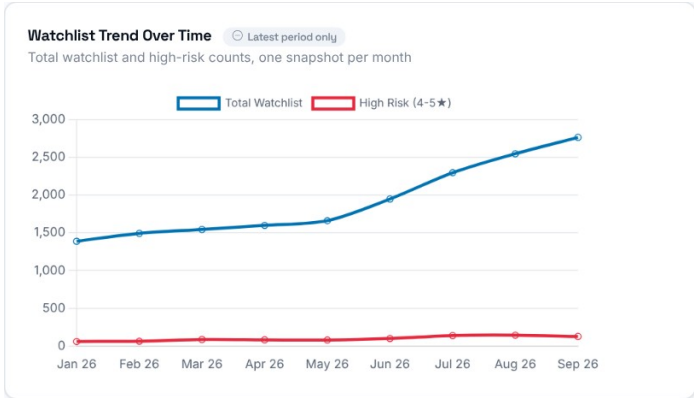

Watch-listed employees grouped by job title.

Then decide: start with the stores at the top of the high-risk chart and talk to their Operation Consultants.

Step 6 - Is the watch list growing?

Two lines, the total watch list and the High Risk (4-5 star) count, for every available month. It ignores the Year/Months filter.

Step 7 - Who needs attention first?

Name	Store	Operation Consultant	Job Title	Hire Date	Tenure (Days)	Risk Score	Reasons
Employee 1	Store 61	Operation Consultant 11	McAcademy	2026-07-29	63	★★★★★	- Still within the first 69 days of hire (63 days) — historically the highest-risk period - Store 61 has a historical early-leave rate of 50% (company average 32%) - McAcademy has a historical early-leave rate of 36% (company average 32%) - Exit interviews at Store 61 show 35% negative sentiment on key engagement factors - Store Leader 81 has a historical early-leave rate of 50% across managed stores (company avg 32%)
Employee 2	Store 139	Operation Consultant 4	Crew	2026-05-13	140	★★★★★	- Still within the first 180 days of hire (140 days) — historically the highest-risk period - Store 139 has a historical early-leave rate of 58% (company average 32%) - Approaching a tenure window with historically high resignations (around 120-150 days after hire) - Exit interviews at Store 139 show 25% negative sentiment on key engagement factors

Employees at 4-5 stars - the most urgent list - with their store, Operation Consultant, role, hire date, tenure so far, star score and the specific reasons that flagged them.

Then decide: make sure someone speaks to each of these employees soon, and look at what the listed reasons suggest (for example a store or role with a history of early leavers).

Name ▾	Store ▾	Operation Consultant ▾	Job Title ▾	Hire Date ▾	Tenure (Days) ▾	Risk Score ▾	Reasons
Employee 126	Store 115	Operation Consultant 26	McAcademy	2026-09-14	16	★★★★☆	• Still within the first 69 days of hire (16 days) — historically the highest-risk period • McAcademy has a historical early-leave rate of 36% (company average 32%) • Exit interviews at Store 115 show 31% negative sentiment on key engagement factors
Employee 127	Store 143	Operation Consultant 11	McAcademy	2026-09-11	19	★★★★☆	• Still within the first 69 days of hire (19 days) — historically the highest-risk period • Store 143 has a historical early-leave rate of 46% (company average 32%) • McAcademy has a historical early-leave rate of 36% (company average 32%) • Store Leader 127 has a historical early-leave rate of 46% across managed stores (company avg 32%)
Employee 128	Store 114	Operation Consultant 20	McAcademy	2026-09-11	19	★★★★☆	• Still within the first 69 days of hire (19 days) — historically the highest-risk period • Store 114 has a historical early-leave rate of 52% (company average 32%) • McAcademy has a historical early-leave rate of 36% (company average 32%) • Store Leader 28 has a historical early-leave rate of 52% across managed stores (company avg 32%)

The Watch List: every flagged employee at 1-3 stars (those at 4-5 stars are in the High-Risk table above, so no one is listed twice). It is sortable and searchable (name, store, consultant, job title), with the same columns as the High-Risk table.

How the star rating is calculated

Every flagged employee starts at 0 points and gains points for each risk factor below that applies to them. The total (the risk score) is then mapped to a 1-5 star rating. 4-5 stars is what the High-Risk table and charts use. The history-based factors only use employees hired on or after 1 January 2026.

Risk score	Stars / level
1	1 star - Low
2 - 3	2 stars - Low-Medium
4	3 stars - Medium
5 - 6	4 stars - High Risk
7+	5 stars - High Risk

Factor	Points and when it applies
New Hire Window	1-3 points: tenure falls within the role's new-hire window (30-180 days by role): under 40% of it elapsed = 1 point, 40-74% = 2, 75% or more = 3.
Store History	1-3 points: the store's 90-day early-leave rate is well above the average store (1, 1.5 or 2 standard deviations above it).
Role History	1-3 points: the job title's 90-day early-leave rate is well above the average job title (1, 1.5 or 2 standard deviations above it).
Peak Resignation Window	1-2 points: tenure is approaching (1 point) or inside (2 points) the store's/role's historical peak resignation window, which only applies after the first 90 days.
Gender History	1 point: the employee's gender group has a 90-day early-leave rate well above the average across gender groups.
Exit Interview Score	1-2 points: the store's exit interviews (at least 3) show above-average negative answers (workload, fairness, communication, training).
Store Leader History	1 point: the store leader's historical early-leave rate, across every store they have led, is well above average.

Scorecard

Where to find it: Side menu > Scorecard

Use this page to compare Store Leaders. It scores every Store Leader (and rolls that up by Operation Consultant and Operation Manager) on four metrics: Turnover Rate, Early Leaver (90-Day) Rate, 180-Day Retention Rate and Exit Sentiment, so leadership performance can be ranked and tracked over time, not just store performance.

Step 1 - Choose the period and your reporting line

Scorecard

Performance rankings across store leaders, consultants, and managers

2026

All Months

Operation Manager

Operation Consultant

Senior Operation Consultants

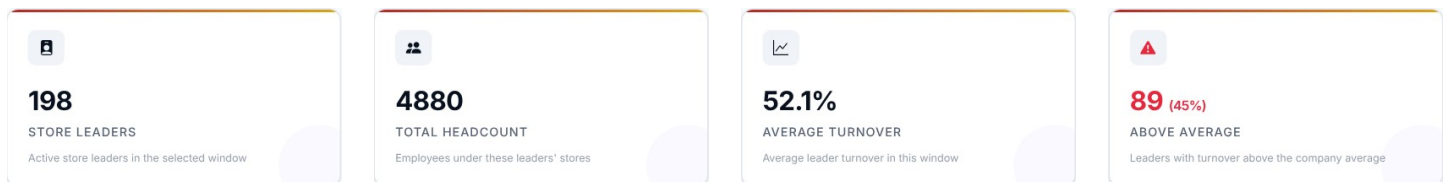

Operation Directors

Job Title

Reset Filters

Choosing an Operation Manager, Operation Consultant, Senior Operation Consultant or Operation Director filters the ranking and the rollups to just their reporting line. The Year/Months filter sets which period's data feeds every metric on the page.

Step 2 - Read the headline numbers

What to look at: Average Turnover and how many leaders are Above Average.

Step 3 - Read the Smart Insights

Best Performing Leader
Store Leader 196 — 0.0% turnover — the healthiest store leader this period.

Leader Needing Attention
Store Leader 5 — 148.9% turnover — the store leader needing the most attention this period.

Operation Consultant to Watch
Operation Consultant 14 — 7/8 (88%) of their store leaders have above-average turnover.

Operation Manager to Watch
Operation Manager 1 — 18/44 (41%) of their store leaders have above-average turnover.

Automatic takeaways, such as the best performing leader, worked out from the ranking below.

Step 4 - Rank the Store Leaders

Store Leader ▾	Store Name ▾	Headcount ▾	Turnover Rate ▾	90-Day Early Leave ▾	180-Day Retention ▾	Exit Sentiment ▾
Store Leader 5	1	15	148.9%	42.9%	0.0%	28.9%
Store Leader 69	1	27	146.9%	37.5%	25.0%	31.6%
Store Leader 92	1	16	144.8%	37.0%	25.0%	26.3%
Store Leader 41	2	24	141.7%	44.4%	7.1%	32.0%
Store Leader 100	2	16	139.9%	31.4%	26.9%	20.8%
Store Leader 133	1	10	138.5%	53.8%	0.0%	No data
Store Leader 42	1	28	121.9%	37.2%	4.8%	14.3%
Store Leader 103	1	15	120.0%	29.2%	16.7%	10.0%
Store Leader 123	1	32	118.8%	47.2%	8.7%	50.0%
Store Leader 28	2	20	115.6%	52.3%	13.3%	16.7%
Store Leader 29	1	20	113.1%	50.0%	10.5%	36.7%
Store Leader 62	1	24	111.0%	46.4%	6.2%	15.2%
Store Leader 49	2	16	110.2%	45.7%	10.5%	30.0%
Store Leader 81	1	12	109.3%	50.0%	0.0%	0.0%
Store Leader 23	1	21	105.3%	40.6%	0.0%	37.5%

Every Store Leader ranked by Turnover Rate, Early Leaver Rate, 180-Day Retention Rate and Exit Sentiment side by side. It is sorted with the worst Turnover Rate first by default - click any column header to re-sort, and use the search box to find a leader.

Use the "Track a Store Leader" search box above the ranking to pick a leader and see their turnover rate trend over time across every store they have led, including a marker where they were transferred between stores, so a change in rate can be told apart from a change of store. (Clicking a leader's name in the ranking opens their own page instead - see below.)

What to look at: leaders who are weak on several of the four metrics at once, not just one.

Then decide: agree support or coaching with the Operation Consultant of the leaders at the top of the list.

Step 5 - Who oversees the weakest leaders?

By Operation Consultant			
Operation Consultants	Leaders	Flagged	Flagged %
Operation Consultant 14	8	7	87.5%
Operation Consultant 18	7	6	85.7%
Operation Consultant 15	5	4	80.0%
Operation Consultant 13	5	4	80.0%
Operation Consultant 16	7	5	71.4%
Operation Consultant 22	7	5	71.4%
Operation Consultant 20	10	7	70.0%
Operation Consultant 4	9	6	66.7%
Operation Consultant 7	6	4	66.7%
Operation Consultant 26	7	4	57.1%
Operation Consultant 8	7	4	57.1%
Operation Consultant 6	7	4	57.1%
Operation Consultant 10	4	2	50.0%
Operation Consultant 1	8	4	50.0%

By Operation Manager			
Operation Managers	Leaders	Flagged	Flagged %
Operation Manager 1	44	18	40.9%
Operation Manager 2	50	19	38.0%

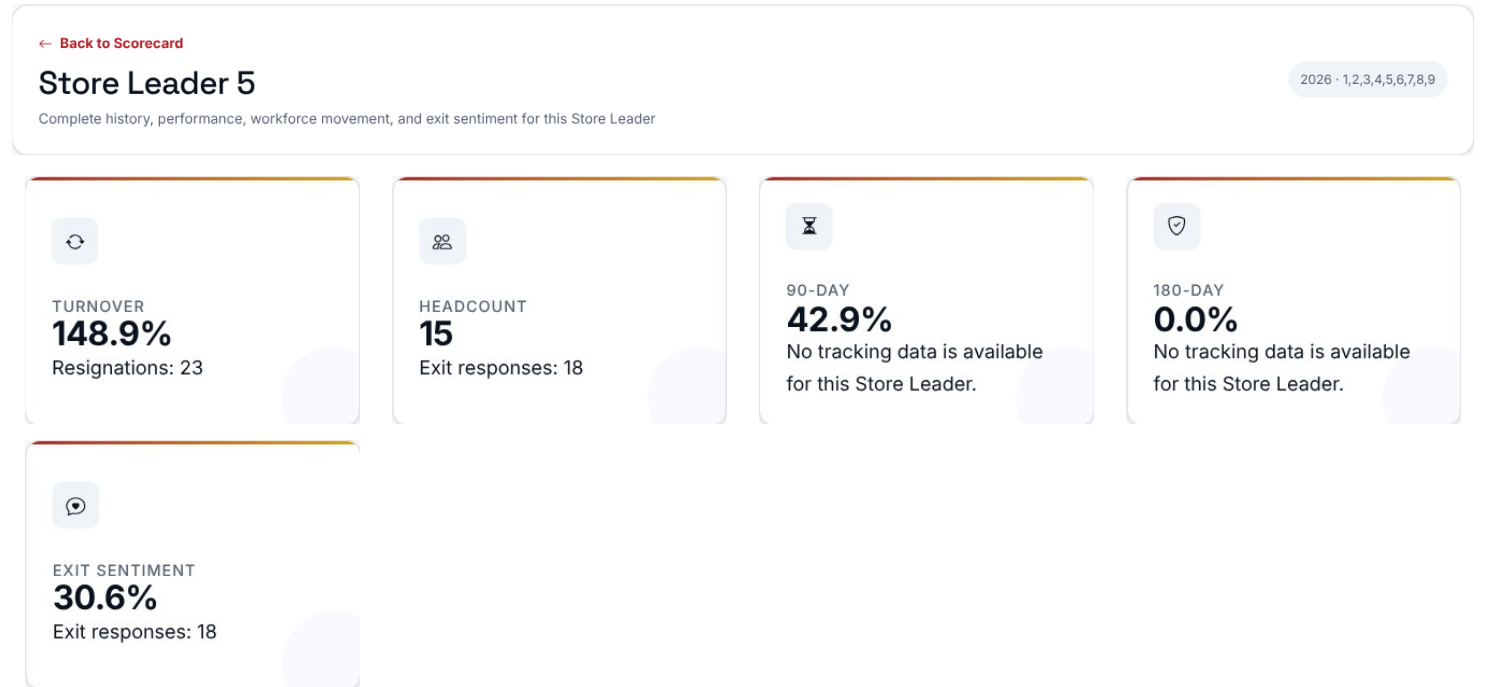

By Senior Operation Consultant			
Senior Operation Consultants	Leaders	Flagged	Flagged %
Senior Operation Consultant 1	22	15	68.2%
Senior Operation Consultant 3	24	12	50.0%
Senior Operation Consultant 2	27	10	37.0%

By Operation Director			
Operation Directors	Leaders	Flagged	Flagged %
Operation Director 1	103	49	47.6%
Operation Director 2	95	40	42.1%

For each Operation Consultant, Operation Manager, Senior Operation Consultant and Operation Director: how many Store Leaders they oversee, how many of those leaders are "flagged" (their Turnover Rate is above the average Turnover Rate of all leaders in the selected period) and what percentage that represents.

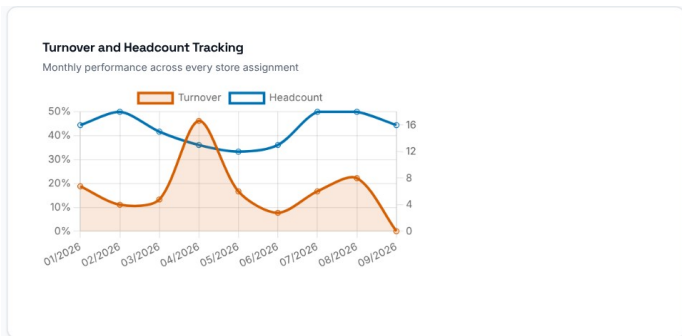

Inside a Store Leader (Store Leader Profile)

Click a Store Leader's name in the ranking to open their own page, called Store Leader Tracking. It gives the history, performance, workforce movement and exit sentiment for that one leader in the period you selected on the Scorecard, across every store they led in that period. Use "Back to Scorecard" at the top to return.

The five cards repeat the four scorecard metrics (Turnover, 90-Day, 180-Day retention and Exit Sentiment) plus the headcount. Turnover shows the number of resignations beneath it, and Headcount and Exit Sentiment show the number of exit responses.

Turnover and headcount, store by store

Monthly turnover rate and headcount across every store assignment, drawn as two lines. Transfers are not marked on the chart; they are flagged with a "Transferred here" badge in the assignment history table beside it, so a change in the rate can be told apart from a change of store.

Store Assignment History			
Transfers are highlighted in the timeline			
Store	Period	Headcount	Turnover
Store 104	01/2026	16	18.8%
Store 104	02/2026	18	11.1%
Store 104	03/2026	15	13.3%
Store 104	04/2026	13	46.2%
Store 104	05/2026	12	16.7%
Store 104	06/2026	13	7.7%
Store 104	07/2026	18	16.7%
Store 104	08/2026	18	22.2%

The store assignment history lists each store, period, headcount and turnover for the leader. Transfers are highlighted in the timeline.

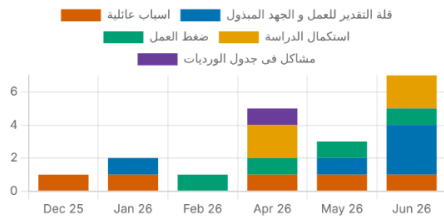

What leaving employees say about this leader's stores

Anonymous exit-interview signals for the stores this leader runs.

Exit Sentiment

Top leaving reasons over time

Exit Sentiment: the top leaving reasons over time.

Reasons for Leaving

Reasons for Leaving: the reasons employees gave for resigning.

Would Return

Would Return: whether leaving employees would consider coming back.

Overall Experience

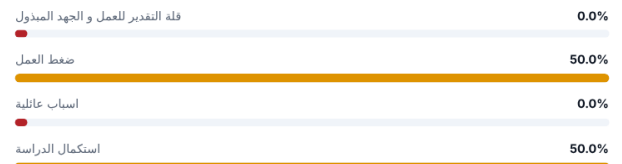

Overall Experience: how leaving employees rated their experience.

Engagement Drivers

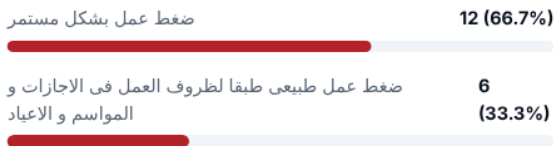

Leaving Reason vs Would Return

Leaving Reason vs Would Return: for each top reason, the share who said they would work here again.

Engagement Drivers: the share who answered positively on each driver, lowest first.

Workload Condition

Training

Fair Treatment

Workload Condition, Training and Fair Treatment: how leaving employees rated each of them.

Exit Responses by Job Title: the exit responses grouped by the leaving employee's job title.

Store	Question	Comment	Date
Store 104	Workload Pressure Reason	Example comment text.	6/24/2026
Store 104	What They'd Change	Example comment text.	6/24/2026
Store 104	What They Learned	Example comment text.	6/24/2026
Store 104	Final Comments	Example comment text.	6/24/2026
Store 104	Workload Pressure Reason	Example comment text.	6/24/2026
Store 104	What They'd Change	Example comment text.	6/24/2026
Store 104	What They Learned	Example comment text.	6/24/2026
Store 104	Final Comments	Example comment text.	6/24/2026
Store 104	Workload Pressure Reason	Example comment text.	6/24/2026
Store 104	What They'd Change	Example comment text.	6/24/2026
Store 104	What They Learned	Example comment text.	6/24/2026

Anonymous Exit Comments: the free-text comments left in exit interviews for this leader's stores, with the store, the question, the comment and the date.

What to look at: whether a drop in the leader's turnover or a rise in exit sentiment lines up with a transfer to another store.

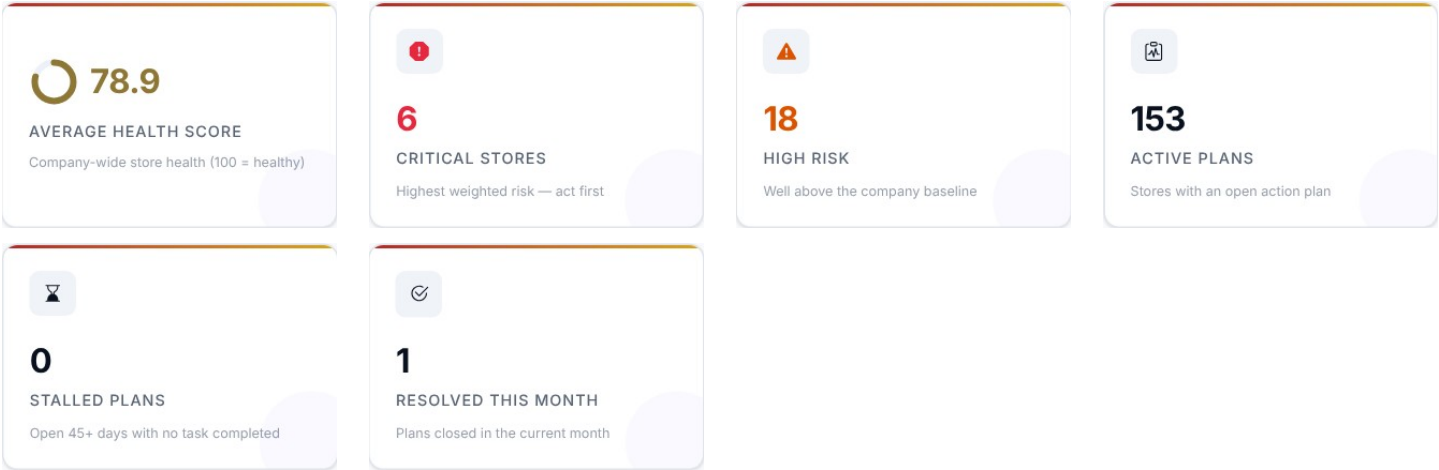

Then decide: use this page to prepare a fair, evidence-based conversation with the leader and their Operation Consultant.

Action Center

Where to find it: Side menu > Action Center

Use this page as your worklist of stores that need action. It scores every store you can access on a Store Health Index - a single 0-100 score where 100 means healthy - and lists them all, ranked by impact-weighted priority. Stores that tripped one of the 7 detection signals also have an Action Plan opened, shown in the Plan column. This page always shows the current state of open and resolved plans, so there is no period filter.

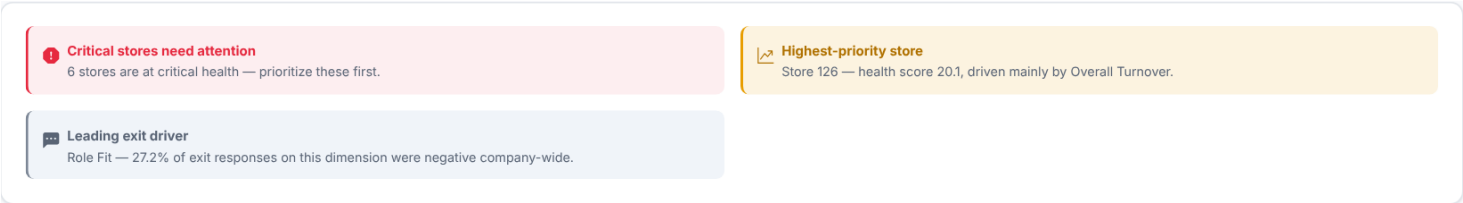

Step 1 - Read the headline numbers

Card	What it shows
Average Health Score	Company-wide store health (100 = healthy).
Critical Stores	Highest weighted risk - act first.
High Risk	Well above the company baseline.
Active Plans	Stores with an open action plan.
Stalled Plans	Open 45+ days with no task completed.
Resolved This Month	Plans closed in the current month.

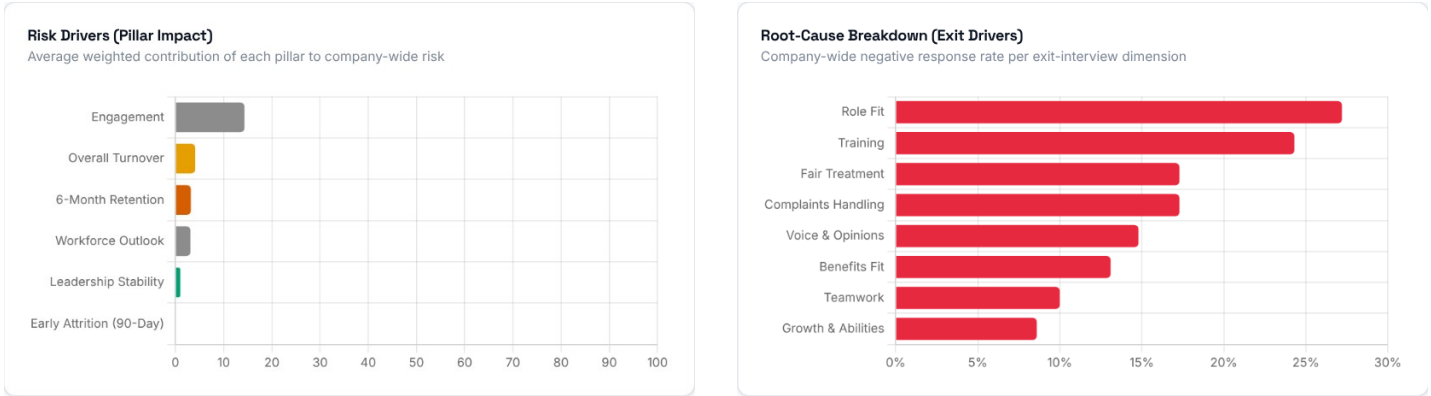

What to look at: Critical Stores and Stalled Plans first.
Then decide: critical stores need action first; stalled plans need someone to follow up with the owner.

Step 2 - Read the Smart Insights

Automatic takeaways about the stores that need attention, worked out from the same data.

Step 3 - What is dragging health down?

Risk Drivers show the average weighted contribution of each pillar to company-wide risk, so you can see which dimension (turnover, engagement, leadership...) is pulling health down across the network. The Store Health Index is built from six weighted pillars: Overall Turnover (24%), Early Attrition (20%), Engagement (18%), 6-Month Retention (16%), Workforce Outlook (12%) and Leadership Stability (10%).

The Root-Cause Breakdown shows the company-wide negative-response rate for each exit-interview dimension (fairness, workload, communication, training...). It replaces a vague "culture" label with the specific driver that leaving employees actually flagged.

Step 4 - Which stores need action?

Store	Health Score	Tier	Top Driver	Pillars	Priority	Headcount	Plan	Responsible	Progress
Store 126	20.1 /100	Critical	Overall Turnover		348	19	Active plan	Operation Consultant 1	0/8
Store 115	44.9 /100	High	Engagement		312	32	Active plan	Operation Consultant 26	0/15
Store 3	49.9 /100	High	Overall Turnover		296	35	Active plan	Operation Consultant 25	0/2
Store 139	26.4 /100	Critical	Overall Turnover		294	16	Active plan	Operation Consultant 4	0/16
Store 179	50.7 /100	High	Engagement		292	35	Active plan	Operation Consultant 4	0/14
Store 197	27.5 /100	Critical	Overall Turnover		290	16	Active plan	Operation Consultant 11	0/6
Store 166	51.4 /100	High	Engagement		279	33	Active plan	Operation Consultant 6	0/14
Store 51	55.6 /100	High	Engagement		274	38	Active plan	Operation Consultant 18	0/10
Store 136	54.1 /100	High	Engagement		268	34	Active plan	Operation Consultant 20	0/5

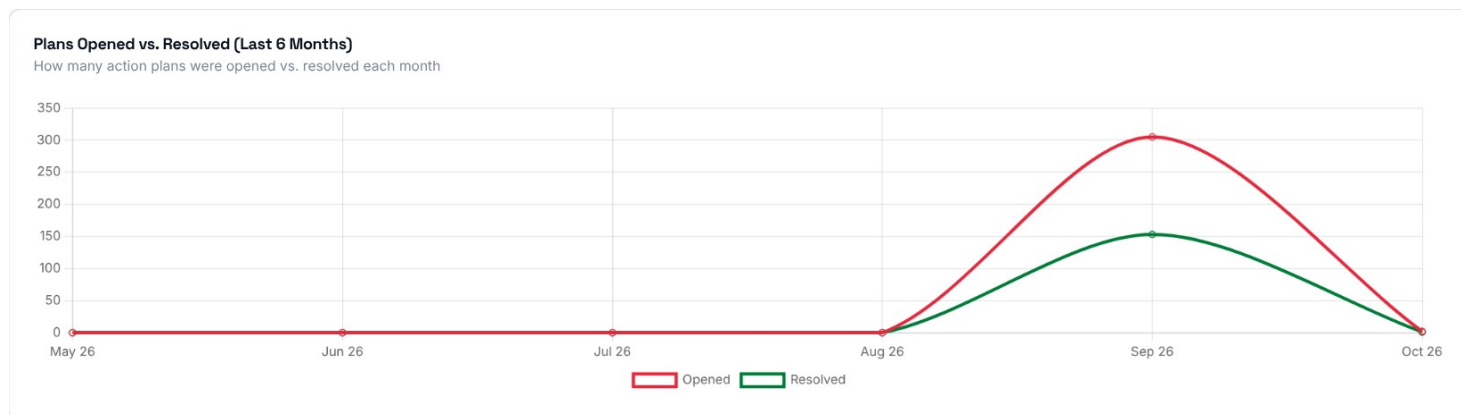

The store scorecard: health score, tier, top driving pillar, the pillar strip, impact-weighted priority, headcount, plan status, the responsible person and task progress. Click the Store, Health Score, Tier, Priority or Headcount header to sort (default: Priority, highest first), and use the search box to filter by store or responsible name. Open a store for its full breakdown and its Weighted Action Plan.

What to look at: stores in the Critical tier, and their Top Driver.

Then decide: agree with the responsible person what will be done about the top driver, and check progress at your next visit.

Step 5 - Are plans being opened and resolved?

Plans opened against plans resolved over the last 6 months. If more plans open than close, open plans are piling up.

How an Action Plan is created

An Action Plan opens automatically the first time any one of these 7 signals fires for a store that has no plan open, each time uploaded data is processed:

Signal	When it fires
High Overall Turnover	Headcount of 5 or more and overall turnover rate at or above 15%.
Early Turnover (90 Days)	3 or more hires in a non-provisional period and an early-leaver rate at or above 30%.
Low 6-Month Retention	3 or more hires and 6-month retention below 70%.
Leadership Instability	2 or more different Store Leaders recorded in the trailing 6 months.
Low Exit Sentiment	2 or more exit interviews with positive sentiment below 50%.
Reason Concentration	2 or more exit-interview reason responses where one reason is cited in 50% or more of them.
Early-Warning Watchlist	2 or more currently active employees flagged high-risk.

A store only ever has one Active plan at a time: a new signal firing while a plan is open is added to that same plan. Severity (Medium / High / Critical) is worked out from how many signals are on the plan. If High Overall Turnover is the only real signal, the system adds a "No Dominant Driver" note that also counts, so such a plan starts at High. Each plan gets a Target Resolution Date when it opens - 90 days out, or 30 days if it is already Critical - and resolves automatically once its store shows no signals for 2 consecutive evaluated periods.

Inside a store (Action Center Detail)

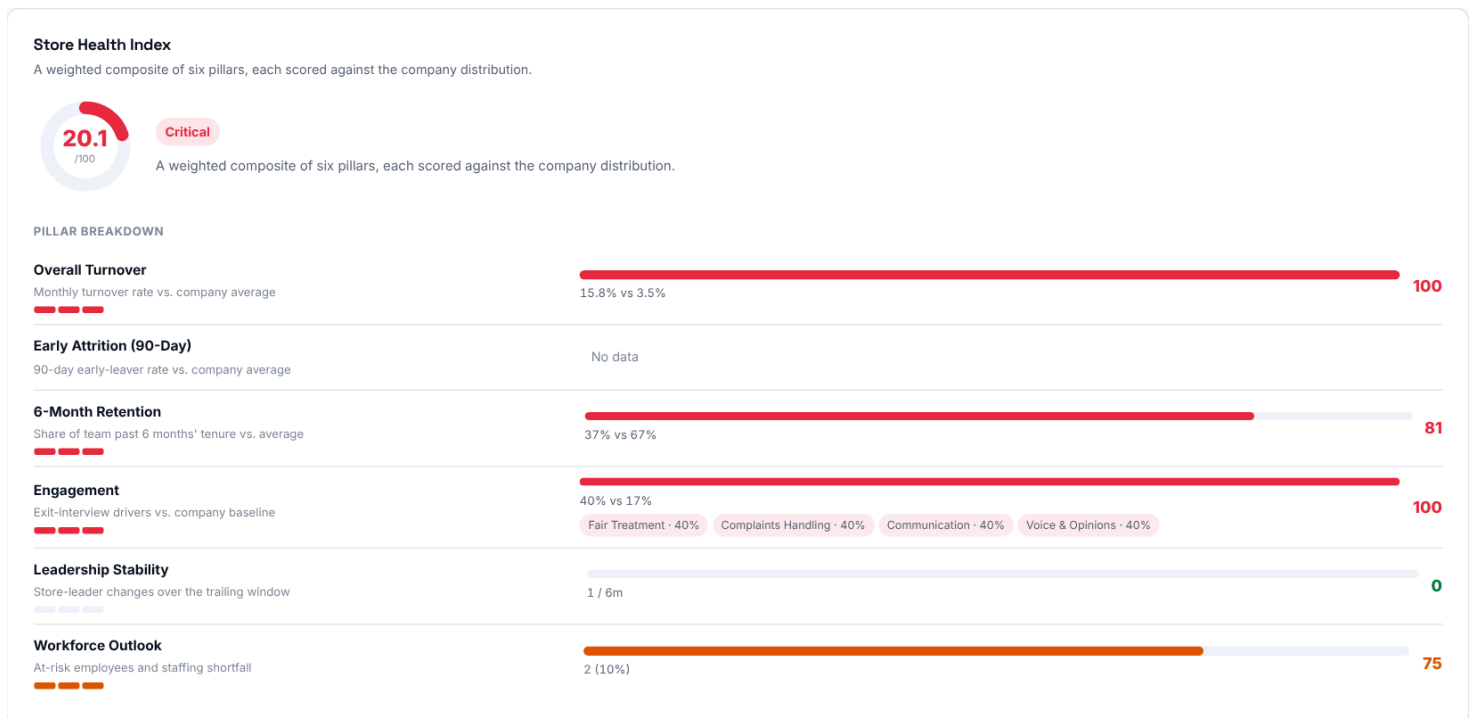

Click a store in the scorecard to open its own page. It is the single-store drill-down behind one row of the Action Center table: what specifically got flagged, the store's current metrics, its severity and Target Resolution Date, the recommended actions, and a place to track progress and leave notes until the plan is resolved. This page always shows one specific store. Use "Back" at the top to return.

Store 126

Active plan Critical Chronic

The header shows the store with its plan status (for example Active plan), its severity (for example Critical) and, where it applies, a label such as Chronic.

Store Health Index

The store's health score (0-100, 100 = healthy) with its tier, and the six pillars behind it: Overall Turnover, Early Attrition (90-Day), 6-Month Retention, Engagement, Leadership Stability and Workforce Outlook. Each pillar shows the evidence behind it, for example this store's turnover against the company average. The Engagement pillar lists the specific exit-interview drivers that scored worst.

Weighted Action Plan

Weighted Action Plan

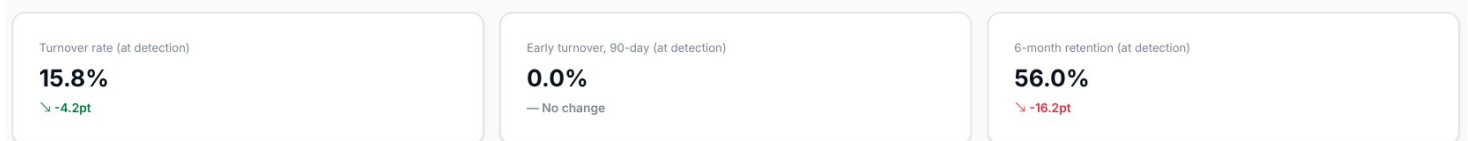

Actions ranked by impact weight, each tied to the pillar and evidence that triggered it.

☐	HIGH Overall Turnover · 15.8% vs 3.5%	30
	Run stay-interviews with current team members to catch issues before they resign.	
☐	HIGH Overall Turnover · 15.8% vs 3.5%	30
	Review scheduling fairness and workload distribution relative to store volume.	
☐	HIGH Engagement · 40% vs 17%	23
	Address fairness of treatment: review recent management decisions and consistency across the team.	
☒	HIGH 6-Month Retention · 37% vs 67%	16
	Create clear growth and scheduling stability for the 3-6 month tenure band before they churn.	
☒	HIGH Workforce Outlook · 2 (10%)	11
	Close the staffing gap: accelerate hiring and onboarding ahead of the shortfall.	
☒	HIGH Workforce Outlook · 2 (10%)	11
	Proactively check in with employees flagged high-risk on the early-warning watchlist.	

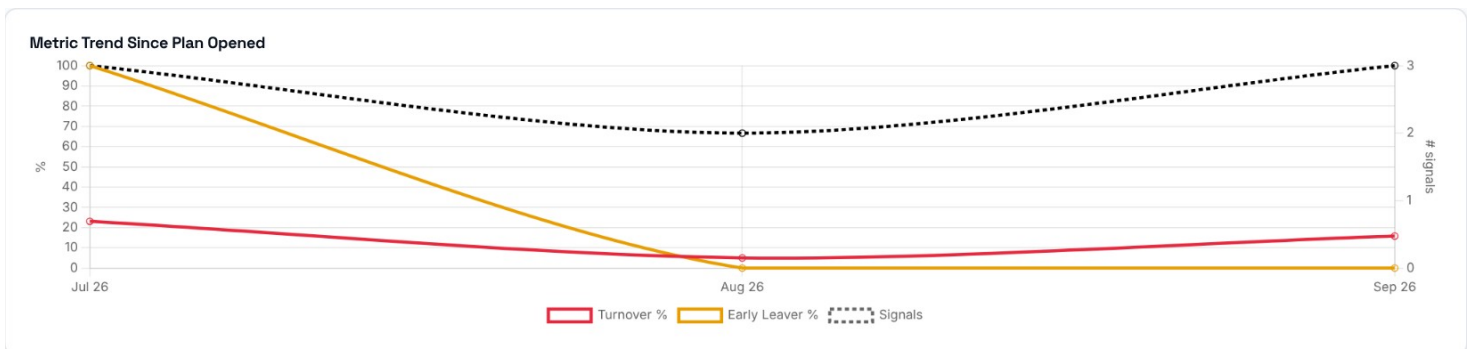

Concrete actions ordered by impact weight, each tied to the pillar and the evidence that triggered it. Where the store has an open plan, matching actions can be checked off and stay in sync with its recommendations.

Then decide: start from the top of the list - those actions have the biggest impact on the store's health.

Where the store stands

The store's latest Turnover Rate, Early Leaver (90-Day) Rate and Retention Rate, each with the change versus the baseline recorded when the plan was opened.

A chart of Turnover %, Early-Leaver % and the number of signals at each monthly snapshot since the plan was opened (shown once there are at least two snapshots), so you can see whether the situation is improving.

Monthly Turnover Performance

Month	Overall Turnover %	90-Day Turnover %	Overall Change vs. Previous Month (pp)	90-Day Change vs. Previous Month (pp)
Jan 26	0.0%	—	—	—
Feb 26	8.3%	0.0%	↗ +8.3pp	—
Mar 26	0.0%	50.0%	↘ -8.3pp	↗ +50.0pp
Apr 26	7.1%	—	↗ +7.1pp	—
May 26	46.1%	50.0%	↗ +39.0pp	—
Jun 26	20.0%	33.3%	↘ -26.1pp	↘ -16.7pp
Jul 26	23.1%	20.0%	↗ +3.1pp	↘ -13.3pp
Aug 26	5.0%	25.0%	↘ -18.1pp	↗ +5.0pp
Sep 26	15.8%	0.0%	↗ +10.8pp	↘ -25.0pp

Overall Turnover % and 90-Day Turnover % for every month the store has data, each with the change versus the previous month in percentage points.

Monthly Performance

Month	Turnover %	Early-Leaver %	Retention %	Signal Count	Change vs. Previous Month
Sep 26	15.8%	0.0%	56.0%	3	↗ +10.8pt
Aug 26	5.0%	0.0%	63.6%	2	↘ -18.1pt
Jul 26	23.1%	100.0%	61.9%	3	—

Every recorded monthly snapshot as a table: Turnover %, Early-Leaver %, Retention %, signal count and the change in Turnover % versus the previous month.

Ownership and follow-up

Responsible	Created	Reporting Quarter	Healthy streak	Chronic
Operation Consultant 1 (Operation Consultant)	Sep 1, 2026	Q3 2026	0 / 2 months	2 plans over time

Detected issues

Overall turnover rate 20.0% (headcount 15) is at or above the 15% threshold.
 Turnover is elevated but no specific driver stands out from the available data.
 6-month retention is 61.9% (13 of 21 hires), below the 70% threshold.
 Positive exit sentiment is 10.0% across 5 exit interviews.

The responsible person, when the plan was created and its reporting quarter, the healthy streak (months without signals), whether it is chronic, and the plain-language explanation of exactly what was detected and why the store was flagged. Admins can assign the plan to a name and set the target resolution date; everyone else sees the same assignment read-only.

Recommendations

0/8 (0%)

- ☐ RETENTION
Review overall staffing stability and scheduling fairness.
- ☐ RETENTION
Conduct stay-interviews with current team members.
- ☐ RETENTION
Assess workload distribution relative to store volume.
- ☐ GENERAL
No single cause stands out — recommend a manual review of recent exits with the Store Leader.
- ☐ RETENTION
Review engagement for employees in the 3-6 month tenure range.
- ☐ RETENTION
Check for consistent scheduling and growth opportunities before the 1-year mark.
- ☐ CULTURE
Conduct stay-interviews with current team to catch issues early.
- ☐ CULTURE
Review recent management/culture incidents reported at exit.

Suggested actions for this store's specific issues, each labelled with its theme (for example Retention or Culture). They can be checked off as they are completed, and the progress is shown at the top.

Signal History

Which signals fired in each period this store has uploaded data for. A period with no upload shows "No data" — it's never counted as clean. A signal marked "Persistent" has fired in at least 2 of the store's last 3 periods with data.

Sep 26	High Overall Turnover ★	Low 6-Month Retention ★	Low Exit Sentiment ★
Aug 26	Low 6-Month Retention ★	Low Exit Sentiment ★	
Jul 26	High Overall Turnover ★	Low 6-Month Retention ★	Low Exit Sentiment ★
Jun 26	High Overall Turnover ★	Low Exit Sentiment ★	
May 26	High Overall Turnover ★	Early Turnover (90 Days)	Low Exit Sentiment ★
Apr 26	Low Exit Sentiment ★		
Mar 26	Low Exit Sentiment ★		
Feb 26	Low Exit Sentiment ★		
Jan 26	Low Exit Sentiment ★		

Which detection signals fired in each period, so you can see whether the problem is persistent or recent.

Notes

No notes yet.

A running log of follow-up notes on the plan: who wrote each one, when, and their role. Admins can also close a plan manually, with a required reason, once the underlying issue has been addressed.

Stores

Where to find it: Side menu > Stores

Use this page as a directory of every store. Each store has a card showing its headcount, turnover rate, resignations, Operation Consultant and a health status at a glance, for the selected period.

Step 1 - Choose the period and your scope

Stores

Turnover health across every store

SELECT PERIOD

SEPTEMBER 2026

SORT BY

TURNOVER RATE (HIGH TO LOW)

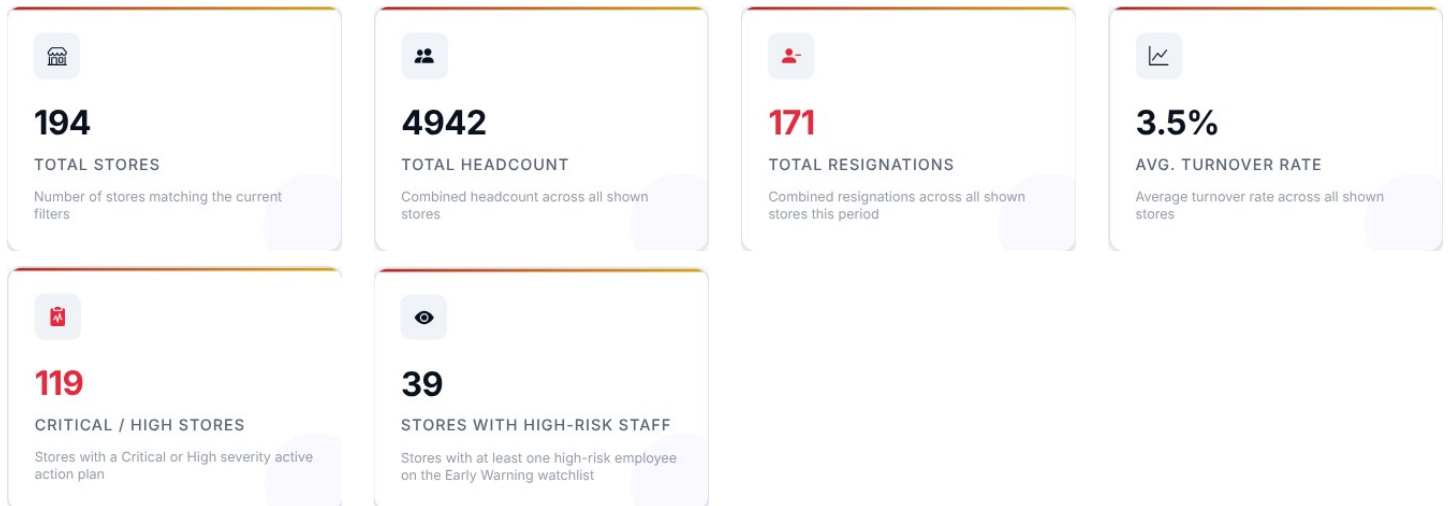

SEARCH STORE, OC, OM...

Search store, OC, OM...

Reset Filters

The period selector picks which month's snapshot is shown. Choosing an Operation Manager, Operation Consultant, Senior Operation Consultant or Operation Director filters the cards to just their stores. The Sort dropdown only changes the order of the cards. The search box hides cards that do not match a store, Operation Consultant or Operation Manager name; neither changes the underlying figures.

Step 2 - Read the company-wide totals

Totals for the selected period across every store: number of stores, headcount, resignations and the average turnover rate (the simple average of the store rates). Two further totals show the current position regardless of the period: how many stores have an active Critical or High severity action plan, and how many have high-risk (4-5 star) employees on the Early Warning list.

Step 3 - Read the Smart Insights

Best Performing Store
Store 1 — 0.0% turnover — the healthiest store this period.

Store Needing Attention
Store 120 — 30.0% turnover — the store needing the most attention this period.

Stores Needing Attention
119 store(s) currently have a Critical or High severity action plan — worth checking on first.

Early Warning Signals
125 high-risk employee(s) flagged across 39 store(s) on the Early Warning watchlist.

Improving Overall
4.9pt average turnover improvement vs. the previous period.

Automatic takeaways: the best performing store, the store needing the most attention, how many stores have a Critical or High action plan, the change in average turnover against the previous period, and the Early Warning signals. Best and worst store are picked only among stores with 3 or more employees.

Step 4 - Browse the store cards

Store 120
10 employees

Operation Consultant 4

Resignations
3

Store 197
16 employees

18.8% ↗ 15.1pt

Store 126
19 employees

15.8% ↗ 10.8pt

Store 3
35 employees

14.3% ↗ 14.3pt

Store 131
14 employees

14.3% ↘ 1.5pt

One card per store. Each card shows:

- the store name, its number of employees and a health badge (Healthy / Watch / Critical) based on its turnover rate against the thresholds configured in Settings;
- the turnover rate, with the change against the previous period;
- its Operation Consultant and its resignations;
- badges such as the action plan severity and the number of high-risk employees;
- when the store has a projection for the selected month, its staffing: actual headcount as a percentage of projected headcount - green (95-100%), amber (85-95%), red (below 85%) or blue (above 100%).

If the store has an open action plan, the card links to that store's Action Center detail.

What to look at: cards marked Critical, and a staffing figure in red.

Then decide: sort the cards by Turnover Rate (high to low), which is the default, and start with the first row.

Inside a store (Store Profile)

Click a store card to open the store's own page. It is a 360-degree profile for one store: use it to understand the store's current workforce position, turnover and early-leaver pattern, risk signals, exit-interview themes and action-plan progress without leaving the store. Use "Back" at the top to return to the list.

From Jan 2026

To Sep 2026

↻

Store 120

One view for this store's workforce, performance, retention, risk, and action plan. · Jan 2026 – Sep 2026

The To selector sets the month used for the headline numbers; the From and To selectors together set the range of the trend charts and monthly tables. Changing tabs keeps the same store and period.

Branch Health Command Center

BRANCH HEALTH COMMAND CENTER

Critical

A decision-ready view built from this store's existing workforce, turnover, retention, risk, exit-interview, and action-plan data.

Jan 2026 – Sep 20266 signals in the latest data period

Priority issues

- There is an active action plan for this store
- 5 recurring signals
- 9 High Risk Employees
- Turnover is above the action-plan baseline

Action progress

Action Plan	Active
Recommendations	0/14
Change from plan baseline	↗ 95.6pt

Current position

Turnover Rate	115.6%
90-Day Early Leaver Rate	46.2%
90-day change from baseline	↗ 46.2pt

Signal history

recurring signals	5
High Risk Employees	9
historical action plans	2

A decision-ready summary built from the selected period's current numbers together with the store's action-plan baseline, recurring signals and high-risk employees: the overall status (for example Critical), the priority issues, the current position, the action progress and the signal history. The status is a decision aid, not a new metric or data source.

Active

Quick Insights

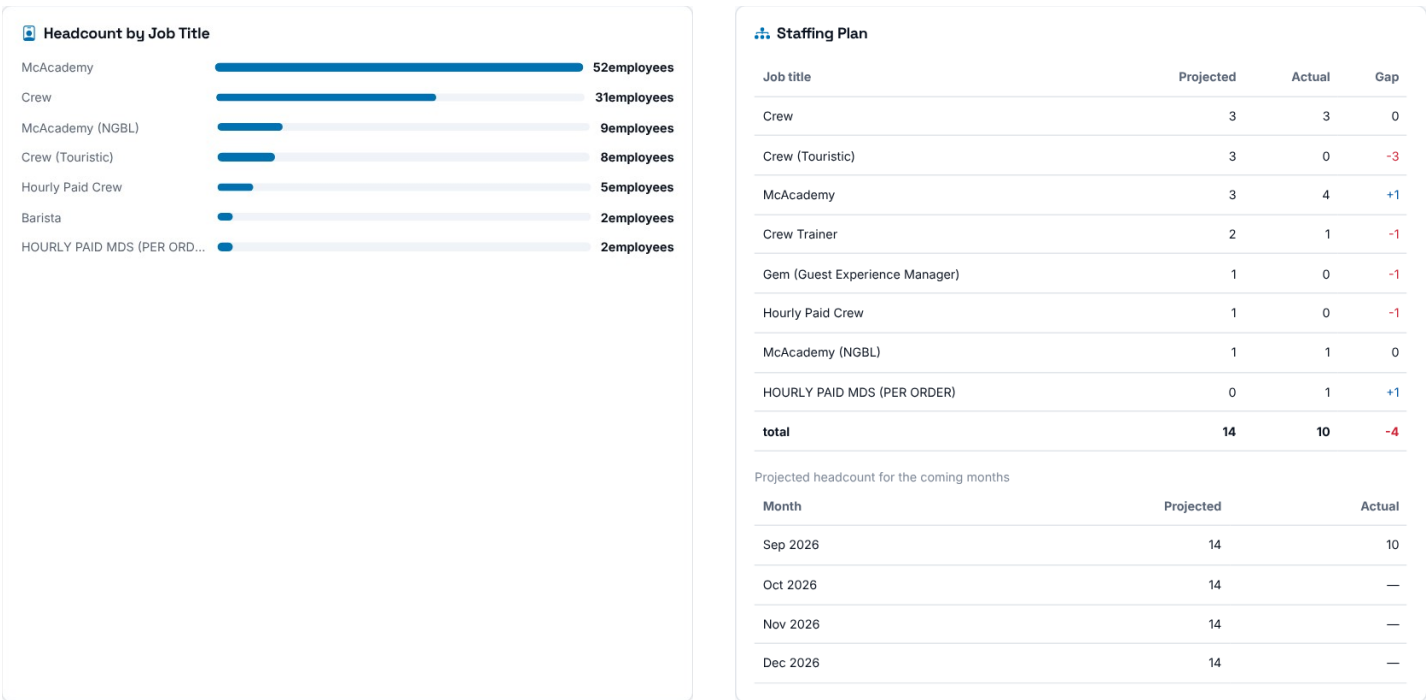

Resignations: 115.6%

Early Warning Watchlist: 9

Action Plan: Active

A short Risk Summary (Early Warning watchlist, high-risk employees and the action plan) and a few auto-generated Quick Insights worth a first look.

Workforce Overview tab

Who is currently in the store and how the team is distributed: headcount by job title, payroll group, tenure and gender. The Staffing Plan card compares the store's projected headcount with its actual headcount by job title (gap = actual - projected: + is a surplus, - a shortage) for the end of the selected period, and lists the projected headcount for the coming months. If no job projection has been uploaded for this store for the selected month, the card shows "No projection for this store in the selected month".

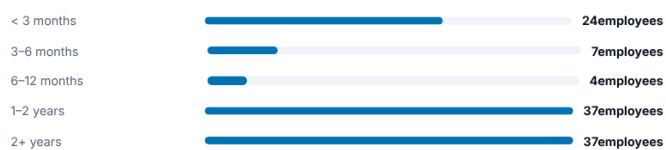

Headcount by Payroll Group

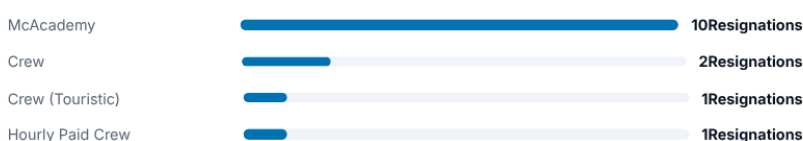

Headcount by Gender

Headcount by Tenure

Turnover by Job Title

Turnover by Tenure

Turnover by Payroll Group

Exit Reasons

Monthly Turnover by Period

To	%	employees	Resignations
Jan 2026	20.0%	10	2
Feb 2026	0.0%	11	0
Mar 2026	0.0%	14	0
Apr 2026	8.3%	12	1
May 2026	8.3%	12	1
Jun 2026	30.0%	10	3
Jul 2026	7.1%	14	1
Aug 2026	18.8%	16	3
Sep 2026	30.0%	10	3

Turnover by job title, tenure and payroll group, the exit reasons, and a month-by-month table of headcount, resignations and turnover rate between the From and To periods. Compare the current rate with the trend and the action-plan baseline before deciding whether the issue is new or recurring.

Retention tab

Retention by Tenure

Retention by Job Title

Retention by Gender

Hiring Trend

How long this store's current team stays: the tenure-band mix, retention by job title and gender, and the monthly hiring trend. It is the flip side of the Turnover tab.

90-Day Turnover tab

90-Day Early Leaver Rate

46.2%

One view for this store's workforce, performance, retention, risk, and action plan.

Monthly 90-Day Turnover

To	%	New Hires	Resignations
Jan 2026	0.0%	1	0
Feb 2026	100.0%	1	1
Mar 2026	50.0%	2	1
Apr 2026	0.0%	0	0
May 2026	0.0%	1	0
Jun 2026	50.0%	2	1
Jul 2026	100.0%	3	3
Aug 2026	0.0%	2	0
Sep 2026	0.0%	1	0

The store's 90-Day early-leaver rate for the selected period and a monthly table of the rate, new hires and early leavers. It helps distinguish an onboarding or early-tenure pattern from broader store turnover.

Early Warning tab

🔔 Early Warning Watchlist			
Name	Job Title	Risk Score	Reasons
Employee 1	McAcademy	4	The reasons behind the score are listed here.
Employee 2	McAcademy	3	The reasons behind the score are listed here.
Employee 3	HOURLY PAID MDS (PER ORDER)	2	The reasons behind the score are listed here.
Employee 4	McAcademy	2	The reasons behind the score are listed here.
Employee 5	McAcademy	2	The reasons behind the score are listed here.
Employee 6	McAcademy (NGBL)	2	The reasons behind the score are listed here.
Employee 7	Crew	2	The reasons behind the score are listed here.
Employee 8	Crew	2	The reasons behind the score are listed here.
Employee 9	Crew	2	The reasons behind the score are listed here.

Who in the store is on the watchlist, with the job title, the risk score and the reasons behind the score. Use it to decide which employees to speak to first.

Exit Interviews tab

Monthly Exit Interviews

To	%	Responses
Jan 2026	0.0%	1
Feb 2026	0.0%	1
Mar 2026	0.0%	0
Apr 2026	0.0%	0
May 2026	0.0%	0
Jun 2026	0.0%	0
Jul 2026	0.0%	0
Aug 2026	0.0%	0
Sep 2026	0.0%	0

Resignation reasons, return intent, overall experience, workload and training ratings, and a monthly table of positive sentiment and number of responses for this store and the selected period. Use it to add context to the numbers on the other tabs.

Action Center tab

Action Plan

Status	Active
Severity	Critical
Recommendations	14

A summary of the store's latest Action Plan: its status, severity and number of recommendations. For the full plan, open the store in the Action Center. Plan progress, recurring signals and the change from the plan baseline are shown in the Branch Health Command Center at the top.

Store Leaders tab

Store Leaders

Store Leader	From	To	Months
Store Leader 130	Jan 2026	May 2026	5
Store Leader 137	Jun 2026	Sep 2026	4

Every Store Leader who has run this store, the period each led it and how many months that covers. The current leader is marked, so you can line up a leadership change with a shift in the store's numbers.

Then decide: when a store looks Critical, read the Overview and Turnover tabs first, then check Early Warning and Store Leaders to find what changed.

Reports

Where to find it: Side menu > Reports

Use this page to download Excel reports. It is a catalog of the downloadable reports available to you, grouped by section. Click any card to open that report's own page, where you pick a period and filters before downloading. This index page itself has no filters - it is just a directory.

Store Operations

Report	What it contains
Action Center	Per-store action-plan status: severity, signals, age, ownership and task progress for every accessible store.
Stores Overview	Every store's headcount, turnover, Action Center status and Early Warning high-risk count for the selected month - the single cross-page view of store health.
Crew Trainers	Trainers against the plan and the 1-trainer-per-6-crew rule for the selected month, by store and by the people responsible, the year's trend, and who joined or left the trainer list.

Workforce & Hiring

Report	What it contains
Workforce	Employee-level roster plus active workforce composition for the selected month (headcount by job title, payroll group, tenure and gender, gender count by store) plus the headcount trend over time.
Workforce Planning	Projected vs actual headcount by job and store: summary, by store, by job, by consultant and manager, the full data sheet and ready-made Excel pivot tables.
Workforce Planning - Detailed Data	The full flat data sheet (one row per store, job and month) and the pivot tables behind the Workforce Planning report. It is large: download it only when you need to analyse the raw rows.
Hiring Forecast	Hires needed per month for a year, by store, job, payroll group and by the people responsible for the stores, with the roster and forecast months marked.

Turnover

Report	What it contains
Turnover	Company-wide turnover trend across every uploaded period, the latest period broken down by store, the full resignation list, and aggregated breakdowns by job title and tenure.
Turnover Trend Matrix	One row per store and one column per month, showing Turnover % across all available periods from the selected year onward, with a Total column (the sum of the monthly rates).
90-Day Turnover	Cohort trend, full list of early leavers, by-store rates and aggregated reasons across all available periods.
90-Day Trend Matrix	One row per store and one column per hire-cohort month, showing the 90-day early-leave rate across all available cohorts, with a Total column (the sum of the cohort rates).

Comparison

Report	What it contains
Comparison	Side-by-side Period A vs Period B: headcount, new hires, resignations, turnover rate and 90-day early-leave rate, company-wide and per store.
OC / OM Comparison	Stores, headcount, resignations and average turnover rate rolled up by Operation Consultant, Operation Manager, Senior Operation Consultant and Operation Director.

Performance & Risk

Report	What it contains
Retention	Milestone rates (90 days to 5 years), survival curve, multi-year trend, store leaderboard and workforce tenure distribution.
Scorecard	KPI rankings for Store Leaders, Operation Consultants and Operation Managers: turnover, 90-day, retention and exit sentiment.
Early Warning	At-risk employee watchlist with star risk scores (7 scoring criteria), flagged reasons, hire date and tenure, filterable by period, store and operations leadership.

Exit Interviews

Report	What it contains
Exit Interviews Report	Reasons for leaving, engagement drivers, workload ratings, overall experience and anonymous comments, aggregated across all periods matching the selected filters.

Then decide: open the report you need, choose the period and filters on its page, and download it.

Inside a report (Report Detail)

Click a report card to open that report's own page. It generates one downloadable Excel workbook. It does not show charts on screen: the filters on the page control exactly what data is written into the Excel file when you download it, so the export matches what you need. Use "Back" at the top to return to the list.

Which filters appear depends on the report: a period or year/months selector, Store / Operation Manager / Operation Consultant / Senior Operation Consultant / Operation Director and Job title filters, or, for comparison-style reports, two independent Period A / Period B panels. Leave a filter empty for "all". Reset Filters clears them.

Whatever you set is built into the Excel file the moment you click Download Excel. To get a different slice of the data, change a filter and download again.

Good to know: some reports are large (for example Workforce Planning - Detailed Data). Download those only when you need the raw rows.
